PREFACE.

THE STATE OF INDIANA,

OFFICE OF SECRETARY OF STATE,

INDIANAPOLIS, July 1, 1880.

In accordance with the requirements of an act, approved February 3, 1853 (1st G. & H., p. 358), the several administrative officers of State, and the Trustees and Superintendents of the Benevolent, Reformatory and Educational Institutions thereof, have submitted to the Governor, and filed in the Executive Department, the reports required of them for the fiscal year ending October 31, 1879, and the calendar year ending December 31, 1879, respectively, which have been entered of record in the order of their reception, and delivered to the Secretary of State for publication, under the order of the Board of Commissioners of Public Printing and Binding.

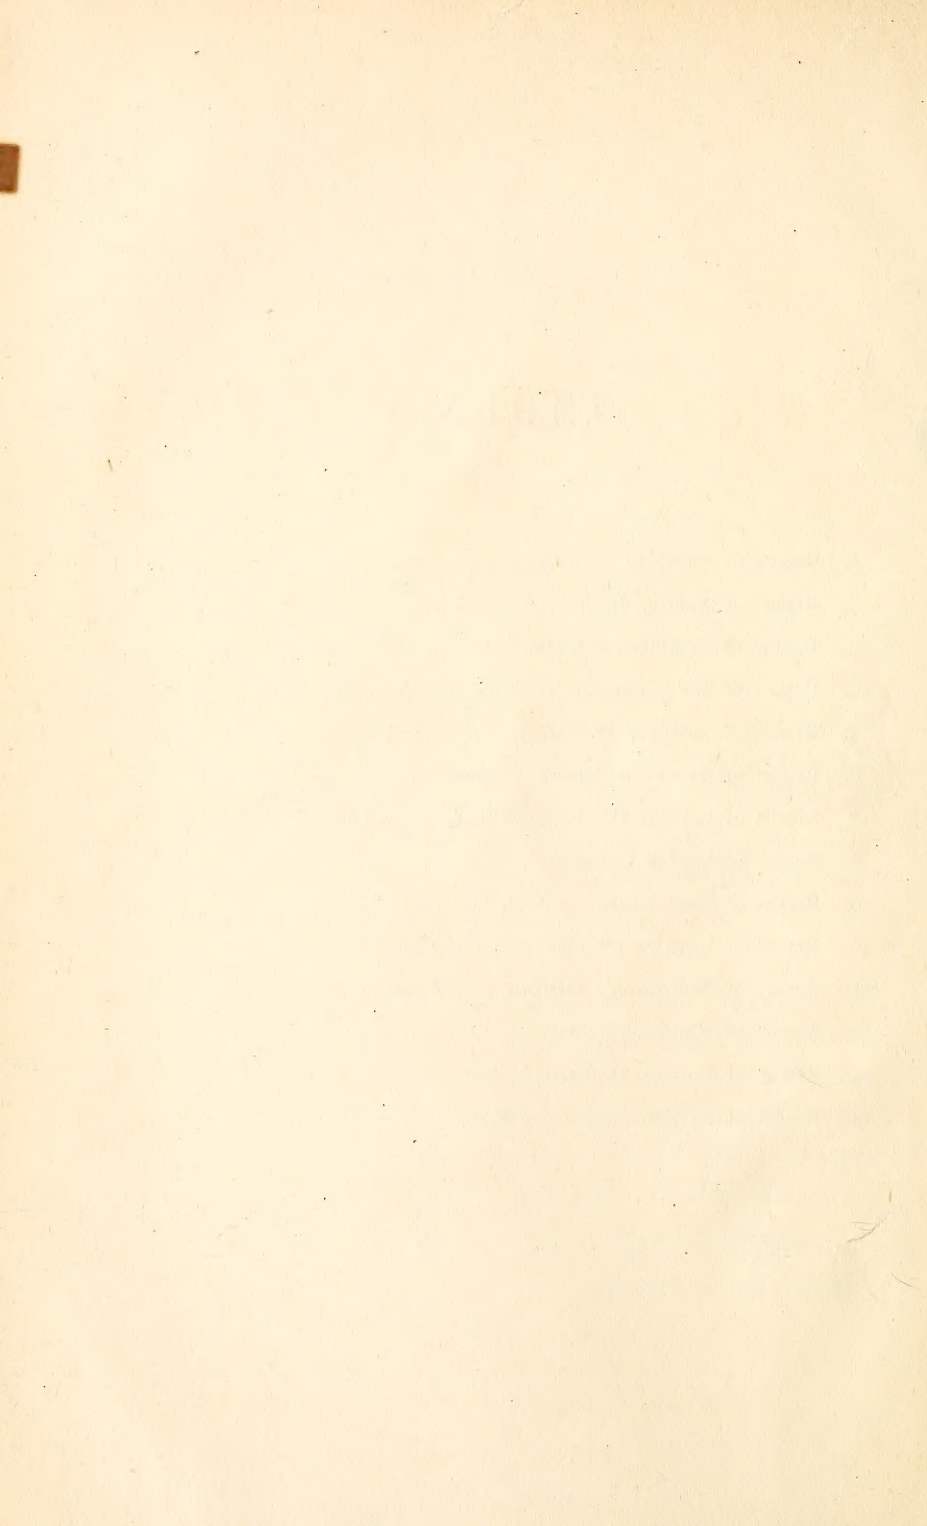

Sixteen hundred copies of these reports are now bound, in two volumes, and issued to the officers and persons designated by law to receive them. The usual number of copies of each report have also been bound in pamphlet form, and delivered to the responsible officer or superintendent of the institution, for distribution in such manner as they may deem for the best interests of the State.

THE STATE OF INDIANA,
GOVERNOR'S OFFICE.

Received December 23, 1879. Examined by the Governor and returned to the Secretary of State to be filed and preserved in his office and published as may be ordered by the Commissioners of Public Printing.

SAMUEL R. DOWNEY,
Secretary.

Filed in my office December 29, 1879.

J. G. SHANKLIN,
Secretary of State.

To his Excellency, JAMES D. WILLIAMS,

Governor of Indiana:

The annexed report of the business of this department, for the year ending October 31, 1879, is respectfully submitted.

J. G. SHANKLIN,

Secretary of State.

REPORT.

ROUTINE WORK.

Tabular statements will be found elsewhere in this report, setting forth in detail a variety of business that may be classed, generally, under the head of Routine Work. A summary statement of this business, however, will be all the information the general reader will require, and this may be given as follows:

During the year, there have been issued from the Executive Department, and attested and registered in this office, three proclamations, sixty-five pardons, twenty-seven remissions, three commutations, twelve swamp land patents, eight university patents, sixty-one requisitions and forty-nine warrants. There have also been issued nine hundred and seventy-five commissions to Notaries Public, one hundred and seventy-five commissions to Justices of the Peace and thirty-three commissions to Commissioners of Deeds. Of the articles of incorporation filed in this office, forty-six are of railroads and ninety-one of manufacturing and other companies. Some of these are amendments to papers previously filed, and some are consolidations of two or more companies.

THE SURVEY OF THE SWAMP LANDS.

The Legislature, at its last session, adopted the following joint resolution:

“JOINT RESOLUTION NO. 22 (Senate.) A joint resolution providing for the appointing by the Governor, Auditor and Secretary of State, of some suitable person to survey certain lands belonging to the State.

“*Be it resolved by the General Assembly of the State of Indiana,*
“That the Governor, Auditor and Secretary of State be authorized
“to appoint some suitable person to survey and plat certain lands

“belonging to the State reclaimed by the drainage of Beaver and English lakes, and the Kankakee river and the Calumet river.”

In accordance with this resolution the State officers appointed to give out the work met at the Governor's office on the 24th day of April last and appointed A. T. Whittlesey, Esq., under a special contract to enter upon the survey.

Beaver Lake.

The land formerly covered with water, known as Beaver Lake Bed, is part of the territory ceded to the United States by a treaty held with the Pottawatomie Indians on the Tippecanoe river, October 26, 1832. (See Statutes at Large, vol. 7, page 394.) It is situate in township No. 30 north, ranges 8, 9 and 10 west, and No. 31 north, range 9 west, in the Winamac Land District of Indiana, and was surveyed under a contract between the United States and Robert Clark, Jr., Deputy Surveyor Samuel Goodnow doing the work, as follows: Township No. 30 north, range 8 west, was surveyed in 1834; the remaining townships in 1835. According to the recorded plats of these townships, as made by Goodnow and certified to by the Surveyor General of the United States, now among the archives of the State, the lake bed covers an area as follows:

In Township No. 30 N., R. 8 W.	929.94
In Township No. 30 N., R. 9 W.	12,552.96
In Township No. 31 N., R. 9 W.	732.92
In Township No. 30 N., R. 10 W.	162.94
Total	<hr/> 14,378.76

This land is now dry and fit for cultivation. The original surveyor did not traverse Beaver lake, but meandered and platted it. Consequently the land within the meandered lines was unsurveyed, and, under the laws of the United States and the decisions and customs of the United States general land office, were not subject to entry, not even to be selected under the swamp land act of September 28, 1850. But the lands adjacent to and immediately adjoining the meander lines of said lake, encircling the lake entire, were selected by the State of Indiana under the provisions of the act of September 28, 1850, and by letters patent of the United States,

dated January 22, 1858, were ceded to the State of Indiana. The original patent is now on file in the office of the Auditor of State.

By this patent it is provided, among other things, that the land should be placed upon the market subject to the order and disposal of the Legislature of Indiana.

The Legislature, by an act entitled "An act to regulate the sale of swamp lands donated by the United States to the State of Indiana, and to provide for the draining and reclaiming thereof in accordance with the condition of said grant," approved May 29, 1852 (see G. & H., vol. 1, page 597), provided the mode by which they should be sold, and under the provisions of the act all of the lands that encircled the bed of this lake, and by the United States patented to the State, were sold by the State in 1854 to Condit and Dunn and to John P. Dunn, during which time John P. Dunn was Auditor of State. Michael G. Bright afterward became the owner of one-half of the lands, and for the purpose of division they made and recorded a plat of Beaver lake, and extended imaginary lines across the lake running north and south and east and west, to divide each section into sixteen subdivisions of forty acres each. These lots were numbered from No. 1 to No. 425, inclusive; Dunn took the odd numbers and Bright the even numbers. The lots that fell to Dunn in this division were sold on execution, and Michael G. Bright became the purchaser, receiving a sheriff's deed therefor. Afterward, in the adjustment of a debt owed the State by John P. Dunn, Bright transferred to Aquilla Jones, then Treasurer of State, by quit-claim deed, dated July 19, 1858, all of the lots that had been purchased at sheriff's sale, that is, the lots that bore the odd numbers from 1 to 423, inclusive, and on December 31, 1860, Aquilla Jones sold and conveyed them by quit-claim deed to the State of Indiana. These two original deeds are in the office of the Auditor of State.

By an act of the General Assembly, entitled "An act to provide for the sale of certain lands belonging to the State of Indiana in the counties of Jasper and Newton, and to give pre-emption to actual settlers thereon," approved December 12th, 1865, the lands thus deeded to the State by Bright and Jones were ordered sold, and were sold to various parties. The State derived from these sales (7,880 acres), the sum of \$8,500. The remainder of the lots, bearing even numbers, as 2, 4, 6, 8, 10, etc., have never been sold by the State.

By an act of Congress, approved January 11th, 1873, entitled "An act to release to the State of Indiana the land known as the "bed of Beaver lake, in Newton county, in said State" (see Statutes at Large, vol. 17, page 409), the title to all of the bed of Beaver lake was transferred from the United States to the State of Indiana.

Governor Hendricks submitted a special message to the General Assembly, under date of January 27th, 1875, calling attention to this matter, and referring to a communication addressed by the Secretary of the Interior to the Senate of the United States, under date of January 31st, 1872, and Executive Document No. 25, of the second session of the 42d Congress. (See House Journal, 1875, page 345.) Since which time no action has been taken concerning these lands until the adoption of the Joint Senate Resolution No. 22 by the last Legislature.

English Lake.

English Lake is merely a widening of the Kankakee river. The river for several miles above the lake is about three chains wide, and below the lake, about four chains wide, while the lake is probably fifteen to twenty chains wide.

The lake is situate in section 36, township 33 north, range 4 west.

The survey of the townships, through which the Kankakee river flows, was made in 1835 by Jeremiah Smith, Deputy United States Surveyor, and the land that the State has a claim on is all of that land lying between the Kankakee river proper and the meandered lines made by the United States Surveyor. In places the meandered lines are distant a half mile, and in other places a mile from the river proper, thus leaving a quantity of land between the river and meandered lines. This land was not surveyed by the United States Surveyor, but is shown on the original map to be part of the river bed.

The State has not yet selected this land under the "Swamp Land act of September 28th, 1850," and can not do so until it is surveyed. The lands of this description will probably exceed 6,500 acres, situate in Laporte and Starke counties, of which amonnt about 3,600 acres have been surveyed during the present season.

Calumet River.

Under an act of Congress dated July 1, 1870, the lands of the Calumet river were sold by the Government of the United States.

Mr. Whittlesey's Report.

At the last session of the General Assembly of this State a joint resolution (No. 22) was introduced in the State Senate, and subsequently passed both houses of the Legislature, which is in the following words:

“A Joint Resolution providing for the appointing by the Governor, Auditor and Secretary of State, of some suitable person to survey certain lands belonging to the State.”

“*Be it resolved by the General Assembly of the State of Indiana, That the Governor, Auditor, and Secretary of State be authorized to appoint some suitable person to survey and plat certain lands belonging to the State of Indiana, reclaimed by the drainage of Beaver and English lakes and the Kankakee river and the Calumet river.*”

In the preparation of a report of the survey made, it may be well to state, at the outset, that, for the purposes of reference and convenience, it has been found best to prepare a separate plat of every section and part of section surveyed, so that its surroundings and connections may be seen at a glance, rather than to connect the whole by township plats, which would necessarily be far too small to indicate the length and courses of the various lines run and courses established in making the survey. By far the greater part of the established courses are fixed at unusual points (and necessarily so, as may be seen by an inspection of the plats), and hence could not be designated in the manner adopted and followed in the surveys of public lands of the United States. As the Legislature required the person appointed to do this work to “survey and plat” the lands indicated by the joint resolution, it has been found that a separate plat of each section and part of section surveyed not only renders the labor less complex, but points out unerringly the courses and distances of the lines and the places where permanent corners have been established, whether the same be the regular section and

half-section corners or additional corners at unusual places, made necessary by the shape of the ground. These latter are far more numerous than the former kind.

Pursuant to the provisions of the joint resolution recited above, on the 25th day of April, 1879, the undersigned entered into contract with your honorable board to survey the lands indicated by the joint resolution. After making the necessary arrangements for the service, a copy of the field notes and plats of the adjacent territory being required, these were carefully copied and compared with the books and records in the office of the Auditor of State. There being some question as to the title to the lands formerly comprising the bed of Beaver lake, it was deemed best to commence field operations in the vicinity of English lake and the Kankakee River. Accordingly, with a suitable force, the undersigned repaired to English lake, where the actual survey was begun on the 4th day of June.

For several weeks the progress of the work was somewhat retarded and necessarily rendered slow on account of the heavy rains and high water in the Kankakee river. This entire region of country is very level, and the rise of a few feet in the Kankakee floods the whole country for many miles around. The waters of the Kankakee at its ordinary stage fill the banks of the river very nearly full, so that a little freshet seriously impeded the work of surveying. A few days' observation rendered it certain that the meandering of the river could only be effected by resorting to the use of boats. These were procured and the work proceeded, and, although the progress was slow, averaging less than a mile a day, it was done accurately and with exactness. The river meanders were begun at the point where the range line between ranges three and four west crosses English lake, and proceeded up the Kankakee to the north line of township thirty-three north, range three west, and down the river to the south line of township thirty-three north, range four west. In protracting the township and section lines east and west, and the range and section lines north and south, it was found that the lines on the opposite sides of the river did not meet together. The difference is shown in every case at the river, so that the lines extended back into the interior are made to conform to the original lines run by the United States surveyors and those subsequently established by the surveyors of Laporte and Starke counties.

The witness trees to corners fixed along the meander lines of the United States surveys have generally disappeared. This is owing, probably, to the fact that the meander lines were mainly run along the margins of prairie land, so as to avoid the timber, which seems to have been, on the outskirts, almost an impenetrable thatch of underbush and creeping vines. It is so to this day in many places. The annual prairie fires have killed many of the trees bordering the prairies. Then, too, the work of "timber grabbing" has been industriously carried on by the settlers living in the vicinity of the public lands. Of this practice further mention will be made. In the survey of this year new corners were established and witness trees marked at all important points where it was practicable to do so. A sufficient number of corners have been permanently established to enable a competent surveyor to locate any subdivision of the work that he may desire to find.

The quality of the lands surveyed is somewhat variable in character, but taken altogether they will be, in the near future, among the most desirable and productive lands in the State. At least they can be made so. The soil is generally a black alluvium, strongly impregnated with sand, and the natural growth upon it is rank and luxuriant. Throughout the whole area there are numerous bayous and bogs, rendering it difficult to follow a continuous course, but these furnish natural sluice-ways by means of which drainage may be effected. The timber along the Kankakee is that usually found in northwestern Indiana. Several species of oak, ash, birch, maple, elm, cottonwood, pepperage and sycamore constitute the usual varieties. In some localities the trees are of large growth, and, on account of the general scarcity of timber in this section of the State, they are very valuable. In consequence, for many years, these lands have been trespassed upon by depredators. In the winter season, when the marshes are frozen up, they go in bands with wagons and teams, cut down the trees and haul them out to accessible points where they are worked up into wood, lumber or crossties for railway purposes, at the convenience of the parties who have committed the trespass. Credible persons have stated that they have seen as high as eighty teams and two hundred men, in a single gang, cutting down and hauling away the timber. Such havoc will speedily make an end of it. Already thousands of dollars worth of the best has been cut and taken away. Unless protection is given to it the timber land will soon be depleted of its natural growth, for the work

of destruction intensifies in the same ratio that the surrounding counties become settled.

I concur in the opinion entertained by nearly all the inhabitants of the vicinity of the Kankakee, that this entire region of country is susceptible of drainage, if the work is undertaken in a systematic and intelligent manner. The removal of the reef at Momence, in the State of Illinois, would unquestionably lower the bed of the Kankakee several feet, and be the means of reclaiming a vast region of arable land that would become, in a little while, the very garden spot of Indiana. Without drainage, much of the country must remain unsettled. The Kankakee river, in the vicinity of English lake, only shows a variance of about four feet between high and low water. Unless its average stage shall be reduced it follows that there can be no permanent drainage of the adjacent country.

In surveying the lands along the Kankakee river the surveyors employed by the United States adopted the system of subdividing the fractional sections into lots, beginning at number one, upon both sides of the river, and running up to as many lots as they made in a section on either side. In my work the same system was observed, generally beginning the number of my lots where the United States surveyers left off, and continuing the numbers up to the maximum of the subdivisions on either side of the river. The number of acres surveyed by me is as follows:

Township 33, range 3 west, Starke and Laporte Common School land	233.34 acres.
Total	<u>4,788.92 acres.</u>

Of the lands lying in township thirty-three, range three, there has been no claim of ownership set up, so far as I have heard, by persons owning the contiguous territory. It seemed to be the settled opinion of the people that here was an area of several thousand acres to which the right of proprietorship was possessed by either the State or Federal Government. But in the adjoining township, No. 33, range 4, a different condition of affairs exists. The owners of the adjacent lots seemed to hold the opinion that they were the proprietors up to the river front by virtue of their riparian interest. However, when shown that they had only purchased a given number of acres, and that they were claiming areas of land far in excess of what they had paid for, they generally conceded that they had been in error, but invariably manifested a desire to be accorded the right to purchase the lots adjoining and immediately connected with those they already held.

Whatever action the State may take looking to the future disposition of these lands it would appear to be an act of simple justice to the settlers to allow them the first right to acquire title to the tracts they have hitherto regarded as their own, and over which they have already exercised acts of ownership. It will be found upon investigation that all along the Kankakee, from the south line of township 33, range 4 west, to the Illinois state line, there are tracts of land in the same condition that prevails in that township. Bends of the river have been cut off by the Government surveyors, marshy tracts and places difficult of penetration have been conveniently passed around by them, and in their reports the areas thus discarded appear as a part of the bed of the river.

The extent of these omissions can only be ascertained by actual survey, and unless the work is undertaken and the question of title settled while the prices of land are comparatively low there will be no end to the litigation that will ensue in after years. It would be the part of wisdom to continue the work begun until all the unknown quantities are ascertained and put in shape for inspection by parties interested, as well as by the authorities of the State.

By reference to the plats made by the United States surveyors it will be seen that they have designated the number of acres of land in the several fractional lots platted by them. These are very generally wrong. By actual survey the errors have been discovered and corrected by me, and the true quantity of land in each lot will be found correctly stated upon the section maps which I have laid before your

Board. In running over their meander lines I have also found errors of a serious character. It not infrequently happens that their courses and distances fail to close across a section by several chains. In such cases I have closed up the gaps and corrected the field notes, taking care to be governed by every point indicated in the original notes which it was possible to find. The notes returned by me will be found correct in every instance. I have also found that the Government engineers paid but little attention to the location of the Kankakee river. Their meander lines, as officially reported, frequently cross over the river from one side to the other. Thus, while pretending to meander the south bank they suddenly cross to the north side without apparent reason, and running across a neck of land, continue their line back over the river the second time, to the side on which they first began. This matter will be fully understood by referring to their meander lines running through township 33, range 4, as I have shown them on the plats returned herewith.

In meandering the Kankakee river I followed the south and east side of the river only. The general shape of the river is the same on both sides, and to have spent a month meandering the opposite bank would have been so much time wasted. Around English lake, of course, I meandered both shores. The survey of the river up stream through range 3 began on the north bank of the lake, but crossed over to the southwest side of the river soon after passing out of the lake into the river. The field notes will indicate the course pursued to any surveyor who may hereafter follow the lines.

On the first day of September, after three months' field service, I received the order of your Board requiring me to suspend operations at English lake. I regard it as a misfortune that you did not see fit to continue the work, as I am satisfied it will be found of great importance in future. What is incomplete now will have to be completed at a time probably when it can not be done as satisfactorily as at present.

Township 34 north, range 3 west, upon which operations had begun when your order of discontinuance was received, contains nearly as much unsurveyed land as was found in the township lying immediately south of it. In fact, by the suspension of this work the State is failing to discover her landed resources, and it

seems to me that the public records ought to show every acre of land to which the State has any show of title or which it ever did possess.

I was unable to visit the lands along the Calumet river at all, although urged to do so by citizens of the vicinity. Here, also, is a fine lot of State property. Already the United States Government, being urged thereto by citizens who desired to purchase, has surveyed that part of the State known as "The Morass," and has sold the same for her own uses. This money might have been paid into the State treasury. If no further action is taken by the State it is probable that the other waste places will be gathered up by the General Government whenever there is a demand for the property.

The surveys have been made at a variation from the magnetic meridian of two degrees and fifty-two minutes, which corresponded with the surrounding work done by the United States and the several local surveyors.

All of which is respectfully submitted.

A. T. WHITTLESEY.

Evansville, Ind., November 1, 1879.

The Survey Suspended.

At a meeting of the State officers appointed by the Legislature to give out this work, held at the office of the Governor August 20, 1879, it was determined to suspend the survey in which Mr. Whittlesey had been actively engaged during the month of May and through the summer. Much of the land, even during the dry summer, was covered with water, which made operations not only difficult but expensive. As will be seen by reference to Mr. Whittlesey's report, he confined his labors entirely to the English lake land, which he had not completed when he was ordered to suspend operations. The many doubts that have existed touching the ownership of these lands caused the State officers appointed to dispose of the matter to hesitate about continuing the work without more definite legislative action. The following correspondence on this subject may be introduced here:

STATE OF INDIANA,
DEPARTMENT OF STATE,
INDIANAPOLIS, October 30, 1879.

To the Hon. Thomas W. Woollen,

Attorney General of Indiana:

SIR—The survey of the lands of the Kankakee and Calumet rivers and English and Beaver lakes, ordered by the last Legislature, has attracted public attention to those lands and revived the oft mooted question as to their rightful ownership. Will you please state, generally, your opinion whether or not the title to these lands, or any part of them, now rests in the State of Indiana?

Respectfully, J. G. SHANKLIN.

STATE OF INDIANA,
ATTORNEY GENERAL'S OFFICE,
INDIANAPOLIS, October 30, 1879.

To Hon. J. G. Shanklin, Secretary of State:

SIR—Your favor of 15th inst. has been received, and so far as I have been able to examine the subject it would seem that the title of the State to the one-half of Beaver lake, which the State has not patented, is good; that the lands lying on the Kankakee river, including English lake, are swamp lands that may be selected by the State, and the title thereto perfected by making the necessary proof. The lands spoken of on the Calumet river seem to have been granted to other parties by the United States before any selection of them was made by the State. By an act of Congress of July 1, 1870, the United States declared them subject to a lien for drainage purposes, and probably under that act they got into the hands of other parties than the State.

I have the honor to be, very respectfully,

T. W. WOOLLEN,

Attorney General.

If the test cases proposed by the Attorney General, soon to be tried, result as he believes they will, there will be many who will concur in the opinion expressed in Mr. Whittelesy's report, that the survey should be continued, and that the State should possess a definite record of her title to these lands.

PUBLIC PRINTING AND STATIONERY.

The contracts for public printing and stationery for two years, between the State of Indiana and the Indianapolis Journal Co. for the first and third classes, and the State of Indiana and Wm. B. Burford for the second class, ended June 30, 1879. During that time there was paid on requisitions allowed by the Board of Commissioners of Printing and Binding, the sum of \$4,518.33 for stationery, and \$30,113.86, for printing, binding and lithographing, as follows:

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, December 19, 1879.

To His Excellency, James D Williams, Governor:

I hereby certify that all the original bills, as approved by the Commissioners of Printing and Binding, are on file in this office, corresponding with the amount contained in the foregoing statement by the Clerk of the Printing Bureau.

M. D. MANSON,
Auditor of State.

At a meeting of the Board of Commissioners of Printing and Binding, held on the 14th day of May, 1879, the following advertisement was ordered published in the Indianapolis Daily Sentinel, the Indianapolis Daily Journal, the Rockport Democrat, and the Laporte Argus:

Sealed Proposals.

To Printers, Bookbinders and Stationers:

The Board of Commissioners of Public Printing, Binding and Stationery, will, in accordance with an act of the General Assembly of the State of Indiana, approved March 13, 1875, receive sealed proposals until 10 o'clock A. M., Tuesday, June 10, 1879, for doing the public printing and furnishing the stationery for the use of the public officers and institutions of the State of Indiana for two years, commencing on the first day of July, 1879. At the date and hour above stated the sealed proposals will be opened and the contracts awarded to the lowest and best bidder, according to law.

The work will be divided into three classes, as follows:

The first class shall comprise the laws, journals, reports of officers of State and public institutions, and all book and pamphlet work to be done on book or pamphlet paper.

The second class shall comprise all record books, legislative bills, commissions, letter heads, circulars, blanks and other work usually executed on writing paper.

The third class shall comprise the folding, stitching, covering and binding, and all work belonging to the binding business.

The contractor will be required to give a bond with approved security for the faithful performance of all work which may be awarded to him. Specifications and full particulars in regard to the work can be obtained at the office of the Secretary of State, and the contract must be to do the work according to the specifications.

The Board of Commissioners reserves the right to reject any and all bids that may be offered. Sealed proposals must be addressed to the Secretary of State.

Bidders are requested to be present at the opening of the sealed proposals.

J. G. SHANKLIN,
Secretary of State and ex-officio Secretary of the Board.

At the same meeting of the Board, the following specifications were ordered printed for the information of all persons who desire to compete for the work specified:

Specifications

For Printing and Binding the Reports of the Officers of State and Public Institutions, for the years 1879 and 1880; the Acts of the General Assembly of the State of Indiana for the year 1881; the Senate and House Journals for the Session of 1881; and furnishing of all Stationery, Blanks, etc., that may be needed by the different departments of the public service, and which are paid for out of the Treasury of the State, for two (2) years from the first day of July, 1879.

The work to be done as above will be divided into three classes, as follows:

FIRST-CLASS.

All the Paper used in printing the Reports, Acts, Journals, and all classes of Pamphlet or Book Printing that may be required for the use of the State, and shall be a clear white, calendered book paper of the weight of 45 lbs. to the ream, and the bid shall be per ream for the amount actually used, no allowance being made for waste, handling, wetting, freight and otherwise.

The composition to be bid by the 1,000 ems, actual measure in the book, no blank pages or other unreal charge to be allowed. Figure work will consist of three justifications of figures or words, without rules, and rule and figure work will consist of three or more justifications of words or figures, with or without rules, and both to be measured as plain matter in accordance with types used.

The presswork to be by the token of 240 impressions. All forms of a less number of impressions to be counted as a full token.

This class includes the printing of the—

John Carlon being the lowest and best bidder, the contract was, in accordance with the law, awarded to him.

The following bond was then filed by Mr. Carlon:

Bond.

The undersigned, John Carlon, Robert Douglass, A. D. Streight, James Renihan, I. C. Walker and Martin H. Rice, do hereby ac-

knowledge themselves bound and indebted to the State of Indiana in the penal sum of thirty thousand dollars.

Witness our hands and seals this thirteenth day of June, A. D. 1879.

The condition of the above undertaking is as follows, viz:

WHEREAS, On the 13th day of June, A. D. 1879, a certain contract was made and entered into between the State of Indiana by its Board of Commissioners of printing and binding, party of the first part, and said John Carlon, party of the second part, respecting the public printing, binding, lithographing and furnishing stationery for the State of Indiana for the period of two years, beginning the first day of July, 1879, reference to which contract is hereby made, the same being made a part of this instrument. Now, if the said John Carlon shall duly perform the terms of said contract, in the manner and form specified therein, then the obligation of this instrument shall be null and void, otherwise in full force and effect.

JOHN CARLON,
ROBERT DOUGLASS,
A. D. STREIGHT,
JAMES RENIHAN,
I. C. WALKER,
MARTIN H. RICE.

STATE OF INDIANA, } ss:

PROCLAMATIONS ISSUED DURING THE YEAR.

THE STATE OF INDIANA.

BY HIS EXCELLENCY, JAMES D. WILLIAMS, GOVERNOR.

A PROCLAMATION OF THANKSGIVING.

To the People of Indiana:

The President has recommended that Thursday, the 28th day of the present month, be observed as a day of national thanksgiving and prayer to Almighty God. I heartily join in the recommendation. While we shall render thanks and praise to the giver of every good and perfect gift for the innumerable blessings which we have received, we will not forget to bestow a portion of our goods upon the deserving poor of our own community, and minister to the wants of the bereaved and distressed who live beyond our borders.

[SEAL.] Witness, the seal of the State and my signature, at
Indianapolis, this 5th day of November, 1878.

JAMES D. WILLIAMS.

By the Governor: •

JOHN E. NEFF, Secretary of State.

BY HIS EXCELLENCY, THE GOVERNOR OF INDIANA.

A Proclamation convening the Fifty-first General Assembly in Special Session. Given at Indianapolis, March 10, 1879.

The Fifty-first General Assembly has consumed the time allowed to its regular session, and is about to adjourn; provision has not been made for the expenses of the State government during the

ensuing two years; other important business has not been completed; the public welfare, in my opinion, requires a brief special session.

Therefore, I, James D. Williams, Governor of Indiana, hereby call upon the General Assembly of the State of Indiana to convene in Special Session, on Tuesday, March 11, A. D. 1879, at nine o'clock in the forenoon.

[SEAL.] Witness, the seal of the State and my signature.

JAMES D. WILLIAMS.

By the Governor:

J. G. SHANKLIN, Secretary of State.

BY THE GOVERNOR OF INDIANA.

A Proclamation Announcing the Publication and Circulation of the Acts of 1879.

THE STATE OF INDIANA, EXECUTIVE DEPARTMENT.

To the People of Indiana:

In pursuance of a provision of the constitution, and a requirement of the statute in such case made and provided, it is hereby announced and proclaimed that the laws of the State of Indiana, passed at the Fifty-first Regular Session of the General Assembly, begun on the 9th day of January, A. D. 1879, and also the laws passed at the Special Session of the said General Assembly, begun on the 11th day of March, A. D. 1879, have been duly published and circulated in the several counties of the State, by authority, and that the last county in which said acts were received and filed is the county of Kosciusko, and the date of said reception and filing is the 31st day of May, 1879, at 4 o'clock P. M.

[SEAL.] Witness, the seal of the State and the signature of the Governor, at Indianapolis, this 3d day of June, 1879.

JAMES D. WILLIAMS.

By the Governor:

J. G. SHANKLIN, Secretary of State.

REGULATIONS AND FORMS

OF

EXECUTIVE PRACTICE.

To secure accuracy in the transaction of the public business and uniformity in the records of the Executive Department, regulations and forms have, from time to time, been adopted, and are published in this permanent form for convenient reference.

NOTARIES PUBLIC.

The statute authorizing the appointment of notaries public requires that persons shall be appointed to the office upon a certificate of qualification and moral character from the Judge of the Circuit Court of their counties, respectively (1 G. & H., p. 445). When a notary public removes from the county in which he resided at the time he was appointed, he thereby vacates his office. (Opinions of Attorney General, 1873, p. 14.) A new certificate is necessary as the basis of an appointment in another county.

[FORM 1.]

THE STATE OF INDIANA,

County.

TO HIS EXCELLENCY,

The Governor of Indiana:

SIR:—I respectfully request that I be appointed and commissioned a Notary Public, resident and qualified in this county, with

the jurisdiction and powers conferred by the Acts of June 9, 1852, and February 12, 1855. In support of my application, I submit herewith a certificate of my qualifications and moral character from the Judge of the Circuit Court of the county, as required by the statute.

Dated at _____,
_____, 18—.

TO HIS EXCELLENCY,

The Governor of Indiana:

SIR:—I hereby certify that _____, of _____ county, is a person of good moral character and qualified to exercise the powers and discharge the duties of a notary public.

_____,
Judge of the _____ Circuit Court.
Dated at _____,
_____, 18—.

Commissions in renewal of an appointment are issued at the expiration of a term without a new certificate, where a sufficient certificate remains on file as a part of the record of the former appointment and the applicant continues a resident of the same county.

COMMISSIONERS OF DEEDS.

A person asking an appointment as a Commissioner of Deeds of this State, resident in any other State, or Territory, or in any foreign country, must furnish to the Governor satisfactory proof of his character and qualifications. The recommendation of the Governor of the State or Territory in which he resides is desirable as being the best evidence. Commissions in renewal of an appointment are issued upon application and the presumed good character and qualifications of the appointee of a former administration.

JUSTICES OF THE PEACE.

Vacancies in the office of Justice of the Peace are filled by appointment of the Board of Commissioners of the county in which

they may occur. The appointment may be properly certified as follows:

[FORM 2.]

THE STATE OF INDIANA.

_____County.

Be it Remembered, That at a _____ meeting of the Board of Commissioners of _____ county, held at _____, on the _____ day of _____, A. D. 18—, present Messrs. _____, _____ and _____, Commissioners, the following proceedings were had:

[Copy the order verbatim.]

I, _____, Auditor of _____ county, hereby certify that the foregoing is a full, true and complete copy of the order of appointment of _____ as a Justice of the Peace to fill a vacancy under authority of the act of March 10, 1875, as the same appears upon the record of proceedings in my custody.

Witness, the seal of the Board of Commissioners of the county, and my signature, at _____, this _____ day of _____, 18—.

_____,
Auditor.

REQUISITIONS FOR FUGITIVES.

In order that due care may be exercised in granting requisitions on the Governors of other States, for the apprehension of fugitives from the justice of this State, the following regulations have been adopted:

The application should be in writing, addressed to the Governor, and should contain a statement, in plain and concise language, of the facts in the case, and of the reasons why, in the opinion of the applicant, a requisition should be issued. It should nominate a proper person to be appointed as the agent to receive the fugitive when apprehended, giving his residence and his official character, if he have any. It should be accompanied by a duly certified copy of the indictment, if one has been found against the offender. If no indictment has been found, there should be furnished a certified copy of a sufficient affidavit made and pending before a magistrate in the county where the alleged offense was committed. It should appear from a certificate of the clerk of the Circuit Court, that the

magistrate is an acting Justice of the Peace, in and for the county. The application should be accompanied, also, by an affidavit that the person charged is a fugitive from justice; that is, that he has fled from the State to avoid arrest; and should show, particularly as may be, the time and circumstances of his flight, and in what State or Territory he is; that he fled from the State before an arrest could be made; and that the ends of justice require that he be brought back to this State for trial. The opinion of the Prosecuting Attorney of the Circuit as to the propriety of granting the requisition should also be furnished.

Requisitions will be granted only upon the express condition inserted therein, that the State will pay no part of the expenses incurred in the pursuit and arrest of the fugitive.

The purpose in granting requisitions is to aid in the administration of the criminal law. No requisition will be issued to aid in collecting a debt, or enforcing a civil remedy against a person who has left the State. In all cases of false pretenses, embezzlement and similar crimes, affirmative evidence, in the form of affidavits, will be required that the real object is not the collection of a private debt.

As notaries public are not magistrates within the meaning of the Federal law, no requisition will be granted upon an affidavit made before a notary public. The law of Congress clearly contemplates an affidavit made in the county where the crime is alleged to have been committed, and before a magistrate having authority to hear the charge when the fugitive shall have been returned by such process to make answer thereto.

If the offense is not of recent occurrence, sufficient reasons must be given why the application has been delayed. In no case will a requisition for an offender be granted at the same time upon the Governor of more than one State. Duplicates of all papers necessary upon the application must be furnished, that one set may be retained in this department and the other attached to the requisition; though but one set need be certified.

[FORM 3.]

TO HIS EXCELLENCY,

The Governor of Indiana:

I respectfully ask that you issue a requisition to the Governor of the State of ——— for the apprehension and rendition of ———,

who stands charged by an ——— pending in the ——— Court with the crime of ———, committed in ——— county, but who has, since the commission of said offense, and before an arrest could be made upon process issued by said court, and with a view of avoiding the same, fled from the justice of the State of Indiana, and into the said State of ———, where I believe he now may be found.

The ends of justice, in my opinion, require that he be brought back to this State for trial. I herewith present a duly certified copy of the original ——— now on file in the office of ——— in said county. In my opinion, the facts stated in said ——— are true, and I believe that the prosecution of the said ——— would result in his conviction of the crime charged. I nominate ———, of ———, as a proper person to be appointed and commissioned by you as the agent of the State of Indiana to receive the said fugitive, when he shall be apprehended, and bring him to this State and deliver him into the custody of the sheriff of said county. The requisition asked for said fugitive is not sought for the purpose of collecting a debt, or enforcing a civil remedy, or to answer any other private end whatever.

Dated at ———, ——— 18—.

THE STATE OF INDIANA, ——— COUNTY.

I, ———, being duly sworn, on my oath say that the facts stated in the foregoing application are true.

Subscribed and sworn to before me, this — day of —, 18—.

To the Governor:

In my opinion it would be proper for Your Excellency to issue the requisition asked.

Prosecuting Attorney.

PARDONS.

In order that due care may be observed in the exercise of the pardoning power, the following rules have been adopted, viz:

1st. Petitions for pardon should set forth all the facts of the

case, and state the grounds upon which the pardon is asked; and should be accompanied by recommendations of officers and citizens of the county in which the conviction took place; and if the offense was committed in a county different from that in which the trial occurred, there should also be recommendations from officers and citizens of the county in which the offense was committed.

2d. A statement of the substance of the evidence certified by the Judge who presided at the trial, or the Prosecuting Attorney who conducted the prosecution, must also be furnished.

3d. If a statement of the substance of the evidence can not be obtained from the Judge or Prosecutor, the reason why it can not be obtained should be stated, and then a statement of any other officer or credible person (verified by affidavit), who heard the evidence, may be substituted.

4th. If the applicant is confined in a county jail, the opinion of the Board of Commissioners of the county as to the propriety or impropriety of granting the pardon should be furnished.

5th. If judgment was pronounced on a plea of guilty, and no evidence heard on the trial of the case, a copy of the indictment or information must be furnished, so that the precise nature of the offense may be understood.

REMISSIONS.

In order that applications for the remission of fines and forfeitures may be brought within the constitutional jurisdiction of the Governor, the following information is furnished: "An act to regulate the remission of fines and forfeitures," approved June 14, 1852 (1 G. & H. 347), provides "That all applicants to the Governor for the remission of fines and forfeitures shall forward to him with their application the opinion of the propriety of so doing of a majority of the following officers in the county where the fine was assessed, or the forfeiture occurred, viz: the Clerk of the Circuit Court, Auditor, Sheriff, County Treasurer, and such officers as shall from time to time have the care and custody of the Common School Fund within the county."

The following form of opinion is recommended to be substantially followed:

TO THE GOVERNOR OF INDIANA :

We, the Clerk of the — Circuit Court, the Auditor, Sheriff and Treasurer of — County (*and the other officers who may join in the opinion*), are of the opinion that it would be proper (*or improper*) for you to remit a certain fine assessed (*or forfeiture taken*) against —, in the — Circuit (*or Common Pleas*) Court, on the — day of —, 18—, in a case wherein (*set out the substance of the judgment, and the nature and circumstances of the crime*) for the following reasons (*setting them out*) :

Where the application is made by sureties, satisfactory proof must be made by affidavits, or other evidence, that they have no indemnity or means of future indemnification.

It having been decided by the Supreme Court (9 Indiana, page 20), that the power of the Governor to remit fines and forfeitures is not absolute, and can only be exercised according to legislative direction, a strict compliance with the statute above recited will be required.

FINES AND FORFEITURES.

STATE OF INDIANA, ATTORNEY-GENERAL'S OFFICE,
INDIANAPOLIS, November 1, 1879.

To the Hon. John G. Shanklin,
Secretary of State :

SIR:—I have the honor to report, in pursuance of section 11 of the act relating to the office of Attorney-General (acts of Regular Session, 1873, page 20), the following as the fines assessed and forfeitures entered in the several counties of the State from November 1, 1878, to November 1, 1879, as reported to me :

SINKING FUND.

The work of ledgerizing the various loans to this fund has progressed as rapidly as the duties of the department would permit. The ledger account has been opened with 1066 loans and the cash account of receipts from 1835 to 1845, a period of ten years, has been gone through and every payment that was made during that period has been transcribed in its proper place in the ledger. The value of these ledgers (three in number) will be great, when completed, as every payment will be shown at a glance, while as it now is, much time is spent and difficulty encountered to ascertain the status of a loan. It is hoped that during the next year more time will be found to devote to this branch of the department.

I hereto subjoin a list of lands forfeited to the State for the use of the College Fund, which lands have been abandoned or which are held and occupied by persons unknown to this office:

No. 657. The southwest quarter of the southeast quarter, and the southeast quarter of the southwest quarter of section 13, in township 7 north, range 9 east, containing 80 acres; also, the southwest quarter of the northeast quarter of section 11, in township 7 north, range 8 east, containing 40 acres, all in Jennings county. Forfeited in 1868, by Sarah A. Vail, for non-payment of \$821.13.

No. 701. Lot in Southport, Marion county, 13 rods and 4 feet by — feet, in the east half of the southeast quarter of section 7, township 14 north, range 4 east. Forfeited by William Wheeler in 1862 for non-payment of \$131.57.

No. 718. The east half of the southwest quarter, and the west half of the southeast quarter of section 18, in township 25 north, range 5 west, in Jasper county. Forfeited in 1870 by John A. Bradshaw for non-payment of \$1,022.90

The following described lands and city and town lots are the property of the State, conveyed to secure the State against loss through defalcation and otherwise :

No. 1. Lots Nos. 18, 19 and 20, in Morton, Coffin and Wright's subdivision of out lot No. 149, in the City of Indianapolis.

Conveyed to the State by John Stumph and wife and Samuel Lefevre.

No. 2. The east half of the southwest quarter of section 5, township 30, range 3 west; the west half of the southeast quarter of section 5, township 30, range 3 west; the northeast quarter of the northwest quarter of section 8, township 30, range 3 west; the west half of the northeast quarter of section 8, township 30, range 3 west; the southeast quarter of the northeast quarter of section 8, township 30, range 3 west, containing 320 acres, all in Pulaski county; and,

No. 3. The south half of the northeast quarter of section 15, township 34, range 2 west, containing 80 acres in Starke county.

Conveyed to the State by Daniel A. Farley, ex-Treasurer of Pulaski county, to reimburse the Swamp Land funds, and University Land funds, in which funds losses to the amount of two thousand dollars had occurred while the said Farley was Treasurer of Pulaski county.

No. 4. Lots Nos. 242 and 243 in the "North Burying Ground," in Marion county.

Conveyed to the State by E. J. Peck and wife.

No. 5. One hundred acres in the southeast quarter of section 1, township 15 north, range 2 east, in Marion county.

Conveyed to the State by James P. Drake and wife, and by quit claim from James H. McKernan.

This land was originally purchased as a site for a House of Refuge, but, under an act in relation to the House of Refuge, approved March 8, 1867, it was sold to one McCaslin, who subsequently forfeited it by non-payment of purchase money, and the title of right reverted to the State. But it seems that, while the same was yet on the Tax Duplicate in the name of McCaslin, it

was sold for taxes, and Mrs. McCaslin bought it, and under this title they are still in possession. To what extent this Tax Sale passes title, I am not apprised, but certainly they have a claim to the amount refunded them that they paid as taxes, from some source. This should be attended to at once, and the State placed in the possession of the land at once.

No. 6. The southeast quarter of section 7, in township number 27 north, in range 4 west, containing 160 acres, situate in White county. Conveyed to the State by Robert Ellis and Anna Maria Ellis.

No. 7. Lot No. one (1), on west side of White river, opposite the City of Indianapolis, and immediately south of the National road, known as the ferry landing.

Of the lands mentioned in my last report, and known as "*Canal Lots*," I desire to report that this land has been in litigation for several years, and by a compromise, as per agreement between the Attorney General on behalf of the State and the Water Works Company, the Hendricks County Circuit Court ordered, among other things, that the title to the east half of that tract of land lying in the City of Indianapolis, and bounded on the east by West street, on the south by Market street, on the west by Blackford street, and on the north by the canal, and being known as part of the "Reservation," be quieted in the State of Indiana. This tract of land has been surveyed and divided, and the portion that fell to the State is now in possession of the State.

By a transcript from the Newton County Circuit Court, in the case of the State of Indiana, for the use of her Common School Fund *versus* John S. Reid et al., the following real estate was found to escheat to the State of Indiana, for the use of the Common School Fund (the same having been owned by Joseph Emmissberger, an alien, who left no heir-at-law capable of inheriting said lands), to wit:

S. W. qr. of S. E. qr. section 12, township 29 N., R. 9 W.

S. E. qr. of S. W. qr. section 12, township 29 N., R. 9 W.

E. $\frac{1}{2}$ of S. E. qr. section 12, township 29 N., R. 9 W.

S. $\frac{1}{2}$ of N. E. qr. section 2, township 28 N., R. 9 W.

All situate in Newton county, Indiana. A question, however, regarding the title to said lands is now pending in the Supreme Court.

Lot No. 77, north side of Market street, between Mulberry street and Ohio avenue, in the City of Jeffersonville, Indiana.

This lot was mortgaged by one Theodore W. McCoy to the State of Indiana to secure a sum of money. Said mortgage was foreclosed, and at the sheriff's sale said mortgaged premises were bid in by the Attorney General for the State of Indiana.

Of the lands ordered sold by the Legislature of 1875, but one piece was sold, it being the southwest quarter of the northwest quarter of section 3, township 16 north, range 5 west, in Putnam county, and was sold, January 13, 1879, for \$1,000 cash (that being the appraised value), to Frederick B. Gardiner. The remainder seems to be appraised at a figure far in excess of its present cash value, and far above what could be realized for either of the tracts.

The only new records that have been filed in this department consist of the plats made by A. T. Whittlesey, Esq., of the survey made by him of lands lying adjacent to the Kankakee river, in Starke and LaPorte counties. These have not yet been bound in book form, but when they are properly examined and compared will be bound substantially for future reference. There are many volumes in this department which are sadly in need of being bound, and the importance of these records is such as to render it not only important but essential that it be done as soon as practicable.

The Canal records are yet in the hands of the receiver. It is very much desired that they be filed in this department at as early a day as is possible, and I trust some speedy action may be taken in regard to this matter.

The Saline records need to be made more available. This can be done only at the expense of a trip to Orange county. This should have been done long since, but as there is no fund on hand out of which this expense might be met it has not been undertaken. The Swamp Land records are in good condition and are being indexed as rapidly as possible.

Respectfully submitted,

JAMES E. BAKER,

Land Clerk.

PROCEEDINGS
OF THE
STATE BOARD OF EQUALIZATION
OF 1879.

OFFICE OF THE AUDITOR OF STATE,
INDIANAPOLIS, June 16, 1879.

Agreeably to an act of the General Assembly of the State of Indiana, entitled "An act to provide for a uniform assessment of property, and for the collection and return of taxes thereon," approved December 21, 1872, the Board of Equalization, within and for the State of Indiana, convened at the office of the Auditor of State and organized as required by law.

The following members were present: James D. Williams, Governor; Isaac P. Gray, Lieutenant Governor; Mahlon D. Manson, Auditor of State, and William Fleming, Treasurer of State.

The members of the Board present and John H. Piercy, Deputy Auditor of State, as Secretary of the Board, took the oath as prescribed by law, as follows:

We, and each of us, do solemnly swear that we will support the Constitution of the United States, and of the State of Indiana, and that we will faithfully and impartially discharge our duties as members of the State Board of Equalization to the best of our ability.

(Signed.)

JAMES D. WILLIAMS,
ISAAC P. GRAY,
M. D. MANSON,
WM. FLEMING.

I, John H. Piercy, do solemnly swear that I will support the Constitution of the United States, and of the State of Indiana, and that I will faithfully perform my duties as Secretary of the State Board of Equalization, to the best of my ability.

JOHN H. PIERCY.

STATE OF INDIANA, }

ANNUAL REPORT

OF THE

TREASURER OF STATE

OF THE

STATE OF INDIANA,

FOR THE

FISCAL YEAR ENDING OCT. 31, 1879.

TO THE GOVERNOR.

INDIANAPOLIS:

DOUGLASS & CARLON, PRINTERS AND BINDERS.

1879.

THE STATE OF INDIANA,
GOVERNOR'S OFFICE.

Received December 12, 1879. Examined by the Governor and transmitted to the Secretary of State to be filed and preserved in his office and published as may be ordered by the Commissioners of Public Printing.

SAMUEL R. DOWNEY,
Secretary.

Filed in my office December 29, 1879.

J. G. SHANKLIN,
Secretary of State.

REPORT.

TREASURER OF STATE'S OFFICE,

INDIANAPOLIS, INDIANA, November 1, 1879.

TO HIS EXCELLENCY,

JAMES D. WILLIAMS, Governor:

In fulfillment of my duty as Treasurer, I have the honor to submit herewith a report of the financial transactions of this department during the fiscal year which ended October 31, 1879.

The total net receipts, from all sources, during the year, and including \$524,350.46 on hand November 1, 1878, were \$3,711,577.83—an increase over the previous year of \$184,843.76.

The net disbursements for the year, for all purposes, were \$3,127,825.91, leaving a balance in the treasury, October 31, 1879, of \$583,751.92.

The principal of the State debt, both foreign and domestic, remains the same as last year. The annual interest has been reduced \$5,100.*

For a full detail of the financial operations of this department, I beg to refer you to the accompanying exhibits and tables, arranged in the following order:

* By the act of March 27, 1879, the debt of \$510,000, falling due April 1, 1879, was paid by the sale of \$510,000 of bonds bearing five per cent. interest, and payable at the pleasure of the State after five years, and at ten years from their date. In 1873, when the debt was created, seven per cent. bonds were issued, payable in three years from date. These were renewed by the issue of a like amount, payable on April 1, 1879, with interest at six per cent. per annum. The seven per cent. bonds issued in 1873 sold at a discount of \$2,051.95; the six per cents issued in 1876, sold at par and on the five per cents sold last April a premium of \$3,187.50 was realized.

ANNUAL REPORT
OF THE
BOARD OF TRUSTEES OF PURDUE UNIVERSITY.

PURDUE UNIVERSITY, January 23, 1880.

To His Excellency, JAMES D. WILLIAMS,
Governor of the State of Indiana :

SIR—The Board of Trustees of Purdue University have the honor to submit the following report for the academic year ending June 30, 1879, and for the fiscal year ending October 31, 1879.

The report of President White gives full and satisfactory information respecting the progress and condition of the University, with a classified statement of the receipts and expenditures for the college year. The report of expenditures is made from the registry record, which not only includes all expenditures but shows their purpose and the departments for which they are made. The Board takes pleasure in calling attention to the increasing prosperity of the University, and especially to the promising beginning made in practical training in agriculture, horticulture, and the mechanic arts. The plans for providing this training have received the unanimous approval of the Trustees, and it is confidently believed that they will be successful. It is a source of regret that unanticipated difficulties have delayed this work so long.

The report of the Treasurer gives the receipts and expenditures for the *fiscal* year of the State, which ends the last day of October, and so does not correspond with the *college* year. This financial

report is required by law. All disbursements by the Treasurer are made on warrants issued by the Secretary of the Board. The accounts of the University, as has been explained in former reports, "are kept in a manner that secures both accuracy and system. All bills must be either expressly allowed by the Trustees while in session or approved by an auditing committee during the intervals between the sessions of the Board. After being so allowed, or approved, they are numbered, classified and registered in the office of the President of the University, which being done, the Secretary issues his warrants upon the Treasurer for their payment, retaining the original bills as his vouchers. The Treasurer, in his turn, pays, cancels and records the warrants. Three records are thus kept of all disbursements. The Treasurer from time to time reports to the Trustees an itemized statement of receipts and payments, and this report, after being carefully audited and approved by the Trustees, is recorded at length in the minute book of the Board by the Secretary."

Special attention is called to the Endowment Fund, which has been increased from \$212,238.50, the original amount received from the sales of land-scrip in 1867, to \$337,000, not including the balance now in the treasury to meet current demands.

The small amount of money received from the Purdue administrators in the past two years greatly embarrassed the Board, but happily a full settlement has just been made (January 22) and the balance due from the Purdue estate has been paid into the treasury of the University. This has enabled the Board to adjust the several funds and increase the invested endowment fund from \$325,000 to \$338,000.

The report of the Farm Committee presents the farm operations for the year 1879. In October of last year the Board decided to make a change in the plan of carrying on the farm. At the opening of the University, the Trustees followed the example of several other agricultural colleges then existing in this country, and employed a superintendent, at what seemed a fair salary, to manage the farm and make it a success. There was an unfavorable balance against the farm from the first, but the Board did not see its way clear to give up the system until all were satisfied that it could not be made to pay expenses. At a meeting of the Board held in October, 1878, it was decided to abolish the office of superintendent, to take effect March 1, 1879, and to entrust the general management of

the farm to a committee of Trustees. This step was taken to reduce the running expenses of the farm and make its management conform to business principles. The Farm Committee consists of Messrs. Sutherland, Haynes, and Williams.

The management of the interests of the University, so far as within the care of President E. E. White and his efficient colleagues who compose the Faculty and corps of teachers, has been to the complete satisfaction of the Trustees. A proof of this is a resolution adopted unanimously by the Board, at a session held in June of this year, declaring "that, as the result of a thorough inquiry into and investigation of the management of the educational and material interests of Purdue University by the President and Faculty, the Trustees express their entire satisfaction over the same, and their complete approval of the judicious and able administration thereof by President E. E. White."

With the perfect harmony existing between all branches connected with the government of the University, and the promising development of the educational plans heretofore adopted, the Board feels confident of a growing and successful future for the institution.

JOHN SUTHERLAND,

President Board Trustees Purdue University.

JOHN A. STEIN, *Secretary.*

PRESIDENT'S ANNUAL REPORT.

To the Board of Trustees of Purdue University:

GENTLEMEN—I have the honor to submit herewith the report of Purdue University for the academic year ending June 30, 1879.

The Fifth Annual Session opened September 11, 1878, with a corps of nine instructors—seven in the College and two in the Academy. The appointment of Miss Alderman as successor to Mrs. Oren, resigned, and the absence of Professor Wiley, who spent six months in Europe, were alluded to in the last report. Professor Wiley resumed his duties in January.

The number of students matriculated in the year was 195, classified as follows:

COLLEGE.

Resident Graduate.	1
Seniors.	2
Juniors.	14
Sophomores.	15
Freshmen	34
Elective	10
	— 76

SPECIAL SCHOOLS.

Chemistry	1
Industrial Art.	11
	— 12

ACADEMY.

Second year.	35
First year.	48
Not regular.	36
	<hr/> —119
	207
Students twice entered (deducted)	12
	<hr/>
Total	195

In addition to the above, fifteen students attended Professor Thompson's Summer School of Drawing, held in the art-rooms of the University.

The number of students in attendance the first year of the University (1874-75) was 64; the number the second year was 67; the third, 139; the fourth, 166; the fifth, 195. The number enrolled the present term is greater than in the fall term of 1878, and the usual per cent of additions the next two terms will increase this enrollment to about 220. These figures show a steady and encouraging growth. In attendance, Purdue now ranks the third of the higher institutions in the State. When the writer took charge of the University in May, 1876, there were only thirty-six students in attendance.

The number of counties sending students has also increased from term to term until all parts of the State are now represented. The present students represent thirty-six counties. The increase for two years past has been largely due to the attendance of students who reside outside of Tippecanoe county. Two students graduated from the College of General Science in June, receiving the degree of Bachelor of Science (B. S.). One of these also completed the course in chemistry, and received the degree of Analytical Chemist (A. C.). The small number of graduates was due to the small number of students who entered the Freshman class in 1875, and to the fact that most of these had no intention of completing the course.

The progress made by the several classes during the year was very gratifying. There were fewer losses from a failure to meet the requirements than in any previous year, and there was a greater per cent of promotions to higher classes at the close of the year. Fewer students pursued irregular and partial courses.

Important donations were made to the cabinets and museum, and to the library. The most valuable of these is the "Scheuch Collection," consisting of twenty-seven cases of insects, mostly beetles, including seven thousand specimens and over two thousand species, collected chiefly in southern Europe, mounted, named and labeled—the generous donation of Fred. Scheuch, Esq., of Lafayette, United States Consul at Barcelona, Spain; (2) the "Levering Cabinet," a large glass-front walnut case, containing a fine collection of minerals, the gift of Col. John Levering, of Lafayette; (3) a valuable collection of about twelve hundred species of plants, many of them foreign, contributed by G. W. Clinton, Esq., of Buffalo, New York; and (4) thirty-seven bound volumes, donated by A. H. Seabury, Esq., of New Bedford, Mass.

The work done in the several departments of the University will be more fully represented in the next annual report, not only to be presented to the General Assembly, but to have a much wider circulation than this. The department reports will hereafter be submitted biennially. The several courses of study are given in the annual catalogue.

In December, 1878, General M. D. Manson, President of the Board, resigned the office of Trustee to enter upon his duties as Auditor of State, and Hon. John S. Williams, of Lafayette, was appointed to fill the unexpired term. General Manson had filled the office of Trustee for four years, and the presidency of the Board for two years. He always manifested the deepest interest in the success of the institution, and was ready at all times to give its affairs needed attention. The loss to the University which might have been occasioned by his retirement, is made good by the hearty interest and intelligent efforts of his successor in the trusteeship. He was succeeded in the Presidency of the Board by Hon. John Sutherland, of LaPorte, who is giving the interest of the University praiseworthy attention. It is very fortunate that no change has occurred in the offices of Treasurer and Secretary. The progress made by the University in the past three years is largely due to the harmonious co-operation of all who have been intrusted with its management; and the fact that this marked harmony continues, is an assurance of its increasing prosperity in the future.

RECEIPTS AND EXPENDITURES

For the College Year from July 1, 1878, to June 30, 1879.

ENDOWMENT FUND.

Receipts.

Interest on bonds, not including bonds sold .	\$14,505 62
Interest and premium on bonds sold— (\$120,000)	5,175 00
	<u>\$19,680 62</u>

Expenditures.

Salaries of members of Faculty	\$14,001 28
Salary of farm superintendent, 8 months. .	533 36
Premium on \$125,000, invested in State bonds	781 25
	<u>\$15,315 89</u>
Interest and premium invested in bonds .	5,000 00

FUND FOR GENERAL EXPENSES.

Receipts.

Students' fees, room-rents, etc	\$1,788 54
Gas, rent, breakage, etc.	334 38
Payments on the Purdue donation* . . .	5,250 33
	<u>\$7,373 25</u>

*NOTE.—The whole amount paid by the Purdue administrators is \$5,808.53, the sum of \$558.20 having been paid in claims against the University, which were allowed by the Board of Trustees. The difference between \$5,808.53 and \$558.20 (\$5,250.33) was entered on the Treasurer's books. The claims allowed by the Trustees were as follows:

July 8, 1875. Paid R. Stilz for wagon.....	\$105 00
Oct. 18, 1875. Paid T. J. Morrison for excavating cellar, etc.....	290 00
Aug. 19, 1876. Paid teamsters for fixing sidewalks.....	28 20
Aug. 26 and Sept. 19. Paid Nethercutt.....	135 00

CURRENT EXPENSES.

It is seen from the above tables that the cost of heat, light, and water is a large item in the current expenses of the University. It was expected that we would be able to make a considerable reduction in the cost compared with that of the previous year, but the unusual severity of the winter was nearly an offset to all extra exertions and care. The cost was \$3,834.89, against \$3,883.06 the previous year, with its mild winter. We buy the best coal for steam purposes, at the lowest prices, and the engineer uses commendable care and judgment in the use of fuel. Our buildings are large and much exposed to the prevailing westerly and northerly winds. We have recently covered all the main steam-pipes in the basement story of University Hall, and have put weather-strips on the windows of the rooms which are most exposed. It is hoped that these and other means now used may reduce the amount of heat required to make this large building comfortable. It would be good economy to re-cover the large steam-pipes, passing under ground from the boilers to the dormitory and the boarding-house. The distance is great and there is evidence that considerable heat passes into the ground and is lost. We are well satisfied with the other expenses of the University. The most rigid economy was used in all departments, and, as a result, the care of the buildings and grounds, the repairs, advertising, printing, supplies, and other incidental expenses involved an outlay of only \$1,954.58. We shall be much gratified if the current expenses of the University, not paid from the endowment fund and other special funds, do not exceed \$5,000 this year. The receipts from students' fees, and other charges, and the appropriations of \$2,000 a year, made by the last General Assembly, will pay more than four-fifths of this sum, leaving a comparatively small amount to be paid from other funds.

APPOINTED STUDENTS.

A comparison of this with previous reports shows that the income from students' fees, room-rents, etc., has not increased correspondingly with the number of students. The receipts from these sources in 1876-79, with 139 students, were \$2,130.35; in 1877-78, with 166 students (the year the student law took effect), they were reduced to \$1,438.61; and last year, with 195 students, they amounted to only \$1,788.54. The number of appointed students

in attendance last year was sixty, nearly all of whom occupied rooms in the dormitories. Appointed students are exempt from the payment of tuition and incidental fees, and charges for rooms, heat, and light. The reduction amounts to about thirty-three dollars a year to each student. It may be best to ask the next General Assembly so to amend the law as to make its provisions apply only to students who are prepared to enter the college classes.

THE FARM.

The change in the management of the farm, unanimously approved by the Board of Trustees in October, 1878, took effect the first of March last, and, consequently, the year covered by the above financial statement, includes eight months of the former management and four months of the present. The deficit is \$686 92. If the office and salary of Farm Superintendent had been continued through the year the deficit would have been about \$900. The present plan of managing the farm dispenses with a superintendent, and it was adopted to bring the running expenses of the farm within its receipts. It is earnestly hoped that the efforts of the Board in this direction may be successful. For five years past the farm has been a tax upon the limited income of the University, the deficit being from \$1,700 to \$1,000 a year. A comparison of the running expenses of the first nine months of the present management with those of the corresponding months of last year, is an assurance that the next report will show a balance on the right side of the farm account. A farm of one hundred and sixty acres of good land, all improved and under cultivation, ought to pay its running expenses.

STATE APPROPRIATIONS.

The failure of the last General Assembly to make any appropriations for the increase of our appliances for teaching, would have seriously crippled the University if the appropriations of 1877 had been fully expended. The small amount received from the Purdue donation obliged the Board of Trustees to use temporarily a portion of these appropriations to defray the current expenses of the University, and make necessary improvements. Besides great care was taken to reserve a portion of each fund to meet any emergency that might arise. It was subsequently discovered that there was an unexpended balance of the apparatus appropriation of 1875.

The condition of these special funds on the 1st of July, 1879, was as follows:

Apparatus, Chemical, Physical, and Mechanical.

Appropriation in 1875, for two years	\$10,000 00
Expenditures to July 1, 1879	8,764 34
	<hr/>
Balance unexpended	1,235 66

Apparatus, Machinery, Cabinets and Fixtures.

Appropriations in 1877, for two years	\$5,000 00
Expenditures to July 1, 1879	2,938 21
	<hr/>
Balance unexpended	2,061 79

Improvement of Grounds, Stock, and Agricultural Experiments.

Appropriation in 1877 for two years	\$3,000 00
Expenditures to July 1, 1879	1,515 84
	<hr/>
Balance unexpended	1,484 16

Books and Periodicals for Library.

Appropriations in 1877 for two years	\$2,000 00
Expenditures to July 1, 1879	1,218 26
	<hr/>
Balance unexpended	781 74

At the June meeting of the Board of Trustees, it was decided to expend one-half of these funds (the fourth excepted) within the present college year, reserving the other half for use the succeeding year (1880-81). A liberal portion of the first balance will be used for the equipment of the School of Mechanics, and the third is to be used for the improvement of the grounds, including practical work and experiments in horticulture.

The last General Assembly appropriated \$4,000 for two years (\$2,000 each year) to assist in defraying the current expenses of the University; \$4,000 for two years (\$2,000 each year) for machinery and improvements and School of Agriculture, including agricultural experiments; and \$1,000 for two years (\$500 each year) for books and periodicals for the library. It is recommended

that \$1,000 of the second item be used for improvements, including the heating apparatus recently put in the green-house; the floor, ceiling, and other improvements recently made in the Mechanics Shop (not including tools and fixtures); and the covering of the steam-pipe in University Hall, and other necessary general improvements. The rest of the appropriation should be devoted to the equipment of the School of Agriculture and Horticulture, and for agricultural experiments.

AGRICULTURE, HORTICULTURE, AND MECHANICS.

The reasons for the delay in providing systematic practical instruction and training in agriculture and the mechanical arts, were somewhat fully stated in the last annual report. The wisdom of this delay has been further confirmed by subsequent experience. We hoped to organize the schools of Agriculture and Mechanics early in the year, but, as our plans were dependent on the assistance of the State, we were obliged to await the action of the General Assembly. When the small appropriations were made, it was too near the close of the college year to organize new classes to advantage. A beginning was, however, made by a course of lectures on horticulture to the Freshman class, by Professor Hussey, and the employment of a practical horticulturist to take charge of the grounds and the nursery. Mr. George Vestal, of Wayne county, was entrusted with this work, and the campus soon showed his taste and skill.

A donation of \$1,000 for a greenhouse, made several years since by M. L. Peirce, Esq., the Treasurer of the University, was found sufficient to erect a neat structure, about fifty feet by twenty feet, with addition for boiler and fuel, and for potting purposes. Mr. Peirce made the contract for the work, and gave it his personal supervision. The entire cost of the building (heating and water fixtures not included) was covered by the donation, and it is recommended that the structure be called the "Peirce Conservatory." It is already partly filled with plants, many having been donated by citizens of Lafayette, and other friends of the University.

It is not proposed to enter largely upon the cultivation of plants for sale, but to make the green-house, nursery, and grounds means of practical instruction and training in horticulture and landscape gardening. We wish to show the most approved method of cultivation and the choicest plants as results. It is expected that the

sale of surplus plants will assist in defraying the expenses of the department.

The instruction in horticulture will be given by the Professor of Agriculture.

THE SCHOOL OF AGRICULTURE.

The plan adopted in 1878 for the organization of the School of Agriculture includes (1) systematic and thorough instruction and training; and (2) a well directed series of experiments in agriculture. It is a great pleasure to say that *this school is in operation*. It was opened in September last.

There are very few men in the country fitted by education and experience to take charge of such a school. This fact made the selection of a person for the position here a difficult task. A wide correspondence pointed to only two available men whose employment we could confidently recommend. The Board was fortunate in securing one of these men, Prof. Charles L. Ingersoll, then Professor of Agriculture in the State Agricultural College of Michigan, one of the oldest and most successful institutions of its class in the country. He is a graduate of the college, and has successfully filled the positions of foremen and superintendent of the farm, and of instructor in agriculture. His training and experience well fit him for the work to be done here. He was induced to accept the position, not by the salary offered (the salaries of the professors in Purdue being small), but by the opportunity presented to do a successful work as an instructor and experimenter. Professor Ingersoll entered upon his duties here in September, and has given daily instruction to a class of deeply interested students. An experimental field of ten acres has been surveyed, platted, and a portion put under experimental cultivation. It is proposed to make this field an "agricultural laboratory," where accurate and valuable experiments can be made on a scale that will not overburden our resources. The experiment begun two years ago on the farm, to determine the proper amount of seed wheat to the acre, was not, it is feared, conducted with sufficient care to make the result very reliable. It was repeated last year in the same field, but, owing to a change in the management of the farm, the information necessary to determine the result was not obtained. I must reaffirm the conviction, deepened by wider observation and experience, that experiments in agriculture must be made under the supervision of a sci-

entific man, who knows the conditions and limits of an experiment and the value of the results reached. Professor Ingersoll has entered earnestly upon this part of his work, and we are confident that he will reach results of great practical benefit to the agricultural interests of the State. But this work can not be accomplished in a few months; only a beginning can be made in the present college year.

The School of Agriculture has been recently supplied with a full set of meteorological instruments, purchased through the United States Signal Service Office. The observations will conform to the method used in the Central Signal Office in Washington, D. C., to which monthly reports will be transmitted. They will include the variations of temperature, including the maximum and the minimum for each day; the force and direction of the wind; the proportion of cloudiness; the amount of rain fall; the barometric pressure; and the relative humidity of the atmosphere, showing the rapidity of evaporation. The value of such observations in comparing the results of field experiments in agriculture in successive years, is evident. The condensed weather records for each year will be published in connection with the reports of experiments. The record of observations will begin January 1, 1880.

THE SCHOOL OF MECHANICS.

The school for practical training in mechanics was opened in October last, and a very promising beginning has been made. The shop is in charge of Mr. William F. M. Goss, a graduate of the department of mechanics of the Massachusetts Institute of Technology, Boston. Mr. Goss is not only a well-trained mechanic, but is familiar with the system of training adopted here. The progress made by the class is evidence of his competency to make the school a success. The shop has been fitted to accommodate five students, the number in the present class, but the fittings may be increased to accommodate ten. Two classes can be instructed each day, and thus twenty students may receive training. The present class began with vice work, and will next take the course in forging. Another year we shall begin with wood work.

In the summer vacation I visited several of the best technical schools in the country to settle important details respecting the course of training in Purdue. The further investigations thus

made have strengthened the belief that the instruction or so-called Russian method of teaching mechanics promises better results here than the construction method. The latter requires a much more expensive outfit, and a good endowment to pay deficits in running expenses. I see no reason, however, why each series of lessons in the course may not *end* with the construction of one or more articles. This would add not only increased interest, but greater value to the training. It is proposed to construct as many of the tools and other appliances needed in our shop as may be possible, and appliances for the several departments of the University will furnish additional practice in construction. This, however, will not be permitted to interfere with systematic instruction and training in those elementary processes and arts which underlie all trades.

THE SIXTH YEAR.

The present term opened September 11, with eleven regular instructors, including the added instructors in agriculture and mechanics, mentioned above. Professor Lambert, for two years instructor in Latin and history, resigned in August to accept the presidency of a college in Oregon. His successor is Prof. John A. Maxwell, for several years professor of Greek and Latin in Moore's Hill College, Indiana. Prof. Maxwell brought to the University a successful experience as an instructor, and his classes are making excellent progress.

The number of students enrolled at this date (December 11) is one hundred and seventy-two;* eighty-two in the College and Special Schools and ninety in the Academy. The number of students in the Freshman class is *thirty-six*. Not a student in the College has been under discipline this year, and the students in all departments of the University are showing an excellent spirit. We have never seen greater industry in study, more general harmony, or more praiseworthy conduct in any body of students.

Permit me, in conclusion, to congratulate the Board of Trustees and other friends of the University on the final completion of the scheme of instruction and training, embodied in the plan of organization adopted in 1876. The opening of the School of Agriculture and Horticulture, with its experimental field, green-house, and other

* The number at the date of this proof-reading (March 10) is one hundred and ninety-four.

appliances for experiment and training, and the starting of the School of Mechanics, with its well-equipped shop, complete the projected system, and are an earnest of success. It is our hope that those who have waited so patiently for the accomplishment of this work, may be rewarded by seeing Purdue University take a high position as a college of Science, Agriculture, and the Mechanic Arts.

Respectfully submitted,

REPORT OF FARM OPERATIONS

FOR THE YEAR 1879.

To the Board of Trustees:

GENTLEMEN—Your committee charged with the management of the Purdue University farm, submit the following report for the year 1879:

The time between the appointment of the committee and the first of March was devoted to the consideration of plans for the running of the farm, including a proposition to rent. A careful investigation of the subject satisfied us that the farm could be made to fill its place as an adjunct of the University, and, at the same time, pay its running expenses, and, to this end, we decided to employ a practical farmer at a salary of \$40 per month and use of house and garden, and to furnish him a regular hand from March 1 to December 1, and such extra help in harvest and at other times as might be needed. It is seen that this arrangement effects a large reduction in the cost of labor and supervision.

Mr. John W. Haynes, of Daviess county, was employed as farmer, and he took charge of the farm March 1, 1879, at which date the following described stock was on the premises, to wit:

One pair of draft mares, 7 years old.

One bay horse, Sam, 10 years old.

One pair mules, age unknown.

HOGS.

Two Essex sows, pure bred, 2 and 3 years old.

Seven Essex shoats, pure bred, 6 months old.

One Essex boar, pure bred, 2 years old.

Six Essex pigs, pure bred, 2 months old.

Two Suffolk sows, pure bred, 1 and 2 years old.

One Suffolk boar, pure bred, 2 years old.

Five Suffolk shoats, 5 months old.

CATTLE—SHORT HORNS.

One pure-bred bull, Cannon Ball, 4 years old.			
"	"	"	" Duke of Purdue 2d, 6 months old.
"	"	"	" Duke of Purdue 3d, 4 months old.
"	"	"	Cow, Lady Chesterford 12 years old.
"	"	"	" Alexandria 4 years old.
"	"	"	" Arabella 4 years old.
"	"	"	" Lady Purdue 1st, 2 years old.
"	"	"	" Lady Purdue 2d, 2 years old.
"	"	"	Heifer, Lady Purdue 3d, 1 year old.
"	"	"	" Lady Purdue 4th, 5 months old.
"	"	"	" Lady Purdue 5th, 5 months old.
"	"	"	" Lady Purdue 6th, 3 months old.

JERSEY CATTLE.

One cow, Lucretia, pure-bred, 8 years old.
 One cow, Susie, pure-bred, 6 years old.
 One heifer calf, pure-bred, 2 weeks old.
 One bull, Duke of Dinsmore, 2 years old.
 One bull, Major B, 1 year old.
 One bull, 2d Earl Purdue, 5 months old.
 One bull, 3d Earl Purdue, 5 months old.
 One half-blood heifer, 4 months old.

The above schedule comprises all the live stock owned on the University farm at date of March 1, 1879, at which time the committee, after due reflection, decided it best to dispose of a portion of it: first, for the reason they were becoming allied by kindred blood; next, in accordance with the original idea that the community might by purchase improve their herds. In accordance therewith, due notice was given, and public sale was made on March 12, 1879, on a credit of nine (9) months. The committee reserved the right to place a bid on any animal offered.

Sales made were as follows:

Hogs, including young pigs, 16 head.

JERSEY CATTLE SOLD.

One cow, Lucretia	\$125 00
One cow, Susie, and calf	125 00
One heifer, half-blood	30 00
One bull, Duke of Dinsmore	50 00
One bull, Major B	55 00

SHORT HORNS SOLD.

One pure-bred bull, Cannon Ball	95 00

MULES SOLD.

One pair, old and crippled	\$127 00
--------------------------------------	----------

It will be seen from the above that there were but three horses left for work on the farm and college grounds. A fourth being required, one was purchased, large, young, and sound, for \$80. In this connection we suggest that the horse on the farm, known by name as Sam, be disposed of by sale or exchange, for the reason that he is in bad health and well up in years, and that a more suitable one be purchased, as a matter of utility and economy.

STOCK ON HAND ON FARM.

The stock now on hand consists of one pair of large mares, 8 years old; one bay horse, Sam, age not known; one bay horse, John, 6 years old. Of cattle there are:

SHORT HORNS.

Four cows, one two-year-old heifer, one yearling heifer, three calves, six (6) months old—two bulls and one heifer.

JERSEYS.

One bull 2 years old, one steer and one heifer, mixed blood, both two years old.

HOGS.

One large Essex sow	3 years old
One large Essex sow	2 years old
One large Essex sow	1 year old
Two small Essex shoats	4 mos. old
One Poland China sow	10 mos. old

The number of hogs formerly on the farm was reduced during the last spring and summer by prevailing disease, which now seems to have abated.

CROPS.

The number of acres of wheat sown in the fall of 1878 was thirty-five (35), all of which was harvested in good condition. It consisted of the varieties known as Fultz, 20 acres; Clawson, 8 acres; Silver Chaff, 4 acres; Golden Straw, 3 acres: total yield of the 35 acres being 974 bushels, by machine measure.

The yield of the different varieties was:

Of Fultz, 20 acres, average,	$30\frac{39}{60}$	bushels
Clawson, 8 “ “	$22\frac{22\frac{1}{2}}{60}$	“
Silver Chaff, 4 “ “	$19\frac{30}{60}$	“
Golden Straw, 3 “ “	$34\frac{40}{60}$	“

The present farmer has not succeeded, up to the present time, in ascertaining the exact amount of wheat sown per acre, either on the experimental or main crop. Experiments regarding the quantity of seed needed per acre in seeding, were made last fall, and in harvesting the present growing crop, can be fully reported.

CORN PRODUCED (1879).

There were cultivated on the farm thirty-four acres of corn, twenty acres of which were drilled, and the balance planted in hills. The drilled corn produced the most per acre. Owing to the dry

season, it required less work to cultivate the drilled corn than that in hills. The total number of bushels produced was seventeen hundred and thirty-eight; average yield, $50\frac{1}{2}$ bushels per acre.

The land upon which the corn was grown, was broken to a depth of from six to eight inches, rolled, harrowed, and cultivated with double plow four times.

OATS.

The number of acres sown to oats was three, drilled one and one-half bushels to the acre. We can not speak as to the yield, the oats not being threshed.

POTATOES.

There were five acres of potatoes, planted from May 7th to 12th, which produced 278 bushels of saleable, and 90 bushels of small potatoes—in all 368 bushels.

The spring drought prevented their early sprouting and growth, and this prevented their maturing in time to avoid the ravages of the so-called bugs. By the use of Paris Green and London Purple its work of devastation was checked and finally overcome. The London Purple was furnished to be used as a test, and we hope to make it more complete in the future.

PASTURAGE.

The amount of money received from this source, independent of the farm stock, was \$92.

1880.

THE STATE OF INDIANA,
GOVERNOR'S OFFICE.

Received December 17, 1879, and referred to the Auditor of State for a verification of the financial statements. Returned by him certified as follows :

OFFICE OF AUDITOR OF STATE,

To the Governor :

J. G. SHANKLIN,

Secretary of State.

REPORT.

To His Excellency, JAMES D. WILLIAMS,

Governor of Indiana :

The Board of Trustees of the State Normal School have the honor to submit their annual report, which is accompanied by reports from the President of the Faculty, the Secretary and the Treasurer of the Board.

Within the past year we have lost the services of Mr. William A. Jones, who has been President of the Institution from its organization, and to whom we are chiefly indebted for the excellent reputation enjoyed by the school. Mr. Jones was compelled to resign on account of failing health, and his resignation was accepted with great reluctance. We have the satisfaction of reporting that we have succeeded in filling his place with Mr. George P. Brown, a gentleman long identified with the schools of Indiana, and well qualified for the position.

Miss Mary A. Bruce, who has been a successful and valued teacher in the school for the past nine years, has also been compelled by failing health to resign, and her place has been filled by Miss Ruth Morris.

For a full statement of the work of the school, attendance, its objects, etc., reference is made to the report of the President of the Faculty, herewith submitted.

It will be seen by reference to the report of the Secretary of the Board that the reduced appropriation made by the Legislature at its last session was insufficient to meet the current expenses of the Institution, and that within the past year the Incidental Fund has been overdrawn to the amount of \$672.69. In consequence of this

reduced appropriation, the Board have been compelled to charge each student a janitor fee of one dollar per term. The Secretary's report shows that one hundred and seventy-nine students have paid this fee. We hope to be able to run the Institution within the appropriation with the assistance of this fee. The building needs repairing very much, but the Board are unable to make any repairs owing to the insufficiency of the appropriations.

All of which is respectfully submitted.

MURRAY BRIGGS,

President of the Board of Trustees.

PRESIDENT'S REPORT.

HON. MURRAY BRIGGS,

President of Board of Trustees,

Indiana State Normal School:

DEAR SIR:—In compliance with the duty imposed upon me by the rules of the Board of Trustees, the following report of the Indiana State Normal School for the year 1879 is respectfully submitted :

ATTENDANCE.

Number enrolled during the Winter term	198
Number enrolled during the Spring term	385
Number enrolled during the Fall term	200

Total for the year	783
Average enrollment for each term	261
Whole number of different persons who have received instruction in the Normal School since its organization . .	2,385
Number of different persons who have attended the Normal School during the past year	530

Of this number 273 entered the school this year for the first time.

The following table will show from what classes of society these have come :

Number whose parents are farmers	175
Number whose parents are mechanics	30
Number whose parents are merchants	18
Number whose parents practice some profession	22
Number whose parents are day-laborers, agents and the like .	20
Number whose occupation was not reported	8

Eighty-two per cent. of those who have entered this year come from the working classes of the population. This ratio does not differ materially from that given in former reports.

WHENCE THEY COME.

Every county except one has had representatives in the Normal School since its organization. The following shows the number that have attended from the different counties:

Adams, 2; Allen, 5; Bartholomew, 7; Benton, 3; Blackford, 1; Boone, 27; Brown, 1; Carroll, 30; Cass, 21; Clark, 24; Clay, 38; Clinton, 10; Crawford, 2; Daviess, 12; Dearborn, 12; Decatur, 33; DeKalb, 11; Delaware, 7; Dubois, 9; Elkhart, 5; Fayette, 12; Floyd, 6; Fountain, 22; Franklin, 7; Fulton, 9; Gibson, 23; Grant, 13; Greene, 16; Hamilton, 20; Hancock, 20; Harrison, 8; Hendricks, 62; Henry, 10; Howard, 7; Huntington, 7; Jackson, 9; Jasper, 7; Jay, 7; Jefferson, 19; Jennings, 10; Johnson, 20; Knox, 35; Kosciusko, 25; Lagrange, 2; Lake, 1; Laporte, 7; Lawrence, 20; Madison, 11; Marion, 59; Marshall, 6; Martin, 5; Miami, 18; Monroe, 9; Montgomery, 26; Morgan, 39; Noble, 6; Newton, 2; Ohio, 3; Orange, 6; Owen, 18; Parke, 68; Perry, 9; Pike, 6; Porter, 1; Posey, 21; Pulaski, 11; Putnam, 28; Randolph, 4; Ripley, 6; Rush, 14; Scott, 15; Shelby, 13; Spencer, 4; Starke, 5; Steuben, 1; St. Joseph, 5; Sullivan, 30; Switzerland, 10; Tippecanoe, 24; Tipton, 4; Union, 6; Vanderburgh, 23; Vermillion, 51; Vigo, 324; Wabash, 33; Warren, 15; Warrick, 26; Washington, 10; Wayne, 51; Wells, 2; White, 9.

FROM OTHER STATES.

Illinois, 31; Kentucky, —; Kansas, 1; Missouri, 1; New Hampshire, 1; New York, 1; Ohio, 11; Virginia, 1; West Virginia, 2.

CONDITIONS OF ADMISSION.

The following are the conditions of admission prescribed by the State:

“First. Sixteen years of age if females, and eighteen if males.

“Second. Good health.

“Third. Satisfactory evidence of undoubted moral character.

“*Fourth.* A written pledge on the part of the applicant, filed with the Principal, that said applicant will, so far as may be practicable, teach in the common schools of Indiana a period equal to twice the time spent in the Normal School; together with such other conditions as the Board may from time to time impose.”

A fifth condition imposed by the Board is, that applicants must pass a fair examination in reading, spelling, geography, grammar, arithmetic and penmanship.

EXPENSES.

Tuition is free. A janitor fee of one dollar per term is the only charge. This is made because of the insufficiency of the appropriation by the last Legislature for the incidental expenses of the school.

Boarding in good families can be obtained at from \$3.00 to \$4.00 per week, according to the locality and quality of the accommodations. Most of the students board in clubs. Their entire expense for *board, furnished room, fuel and light*, ranges from \$2.00 to \$2.50 per week.

Arrangements have been made with publishers, so that in future the text-books used in the school will be rented to those students who do not wish to purchase.

RELATION OF THE NORMAL SCHOOL TO THE COMMON SCHOOLS.

For the information of those other than the Board of Trustees who may read this report, it seems to me fitting that a restatement be made of the ground for the existence of the Normal School.

It is assumed that schools for the education of the children should exist. This assumption carries with it the correlative one that teachers must be employed to teach these schools. Upon the two institutions, the family and the school, depends largely the education of the children. The school is designed to supplement the education received in the family. It is designed to give a methodical and systematic exercise of those faculties of the mind which would otherwise be developed spontaneously through the agency of nature and the customs of society. Nature and custom will serve as the only school-masters in a low stage of civilization, perhaps, but the existence of arts and trades, and of the complication of events at-

tendant upon a high state of civilization and culture "render it impossible for man to be ruled longer by mere custom." They must be educated. "Education must lead the pupil by an interconnected series of efforts previously foreseen and arranged by the teacher to a definite end. Hasty and inconsiderate work may accomplish much, but only *systematic* work can advance and fashion him in conformity with his nature." This requires that schools be established. That these schools may accomplish the work for which they are organized, they must be taught by educated and competent teachers.

WHAT IS A NORMAL SCHOOL?

A Normal School is a school for the education of persons in the science and art of teaching. It sustains a similar relation to the vocation of the teacher that the medical school does to the vocation of the physician. The science of medicine and the science of education have many points of resemblance.

1. The science of medicine is dependent upon other sciences. It is dependent upon biology and physiology for its knowledge of that upon which it must operate; and upon chemistry and physics for its materials with which it operates. In like manner the science of education must obtain its knowledge of that upon which it is to operate, viz: the mind—from psychology; while, for the material with which its results are to be produced, it is dependent upon the sciences and the arts taught in the schools; these being the means or agencies used for the education of the mind.

2. Medicine, also, may have to deal with a healthy or an unhealthy body, laboring to restore or to preserve health. In like manner education deals with the healthy or diseased mind, and labors to stimulate and direct the proper and natural development of the one, or to restore the other to natural and right habits of action.

This parallelism between the science of medicine and the science of education is obvious. The latter has all the marks of a science that attach to the former. The relative importance of these two sciences must be determined by the relative importance of mind and body.

If a special education is necessary to fit the physician for the duties and responsibilities of his profession, it must be admitted

that there are reasons equally cogent why the teacher should receive a special education to fit him for the duties and responsibilities of teaching. In this we find a sufficient reason for the existence of the Normal School.

THE WORK OF A NORMAL SCHOOL.

The instruction given in a Normal School should regard, primarily, methods of teaching.

To be able to invent a proper method of teaching, the teacher must know the laws of the mind's activity and growth. Psychology is, therefore, the science which lies at the root of the science and art of teaching. That upon which the teacher must operate is the mind. The result he seeks to obtain is the formation of right habits of thinking and acting, and the correcting of many habits of thinking and acting.

To be able to do this intelligently, he must have a knowledge of "the powers and functions of the human soul."

But not only must the teacher know that upon which he is to operate, he must know also the material which is to be used in the education of the mind. This material is the sciences and the arts which are taught in our schools. It has been said that it is not in the province of the Normal School to give instruction in these subjects; that this is the work of the High School and the College. But the other and truer view is, that the teacher must have a profounder knowledge of the branches which he is to teach than he will obtain in the High School or the College. He must have more than a practical working knowledge of these subjects. He must know them as sciences and as arts. This knowledge is necessary in order that he may be able to discriminate between the essential and the comparatively non-essential parts of each subject, and give his students that practical working knowledge which it is the business of the ordinary school to impart. He must study these subjects from the point of view of the teacher, and be able to determine what points to press and what to touch lightly in his teaching. He must know *consciously* the relative value of knowledge.

These statements imply that the teacher should recognize another purpose of the school than that of forming right habits of thinking and acting. In the school the pupil must obtain a practical knowledge of those sciences and arts that are the instruments by which

the affairs of business and social life are conducted. He must learn reading, writing, arithmetic, geography, English language, and the like, because of their relations to the different employments by which men earn a livelihood. To the pupil the purpose of the school must appear to be the gaining of this knowledge. It is by his progress in his studies that he should estimate the value of the school to himself. He must make the gaining of this knowledge his business. But little effort need be made to lead the pupil to see that the great purpose of the school is to form right habits of thinking and doing. Yet the teacher should be conscious of this at every step of the pupil's progress.

Our schools are not doing all that they ought to do and might do to prepare the children for the duties of life, because of the mistaken view so prevalent among teachers and parents that the *means* by which a child's education is obtained is the *end* or *purpose* of that education.

While, therefore, the Normal School should deal principally with *methods of teaching*—and this should be the mark of distinction between this class of schools and others—it must, also, furnish instruction in the matter. Its true function is to give instruction in both the *How* and *What* to teach.

ANOTHER VIEW.

When we consider the amount of money expended for school purposes in the State, and the average length of time each teacher continues in the profession, the necessity for a preparation for teaching becomes still more obvious.

From the report of the State Superintendent for 1878, we find that, in 1877, the entire school population in the State was 694,706. Of this number 498,726 were enrolled in the schools. To teach this number of children, 13,574 teachers were employed. The amount of money paid to these teachers was \$2,967,539. The average amount paid to each teacher in the country schools was estimated to be \$144. The total cost of the schools, including the money paid for school-houses, repairs, apparatus and other expenses, was more than \$4,000,000.

Indiana has a permanent school fund of about \$9,000,000. The interest upon this fund furnishes a portion of the revenue for pay-

ing the expenses of the school, but by far the larger part is derived from a direct tax upon the property of the State. The schools cost the people every year more than three million dollars in addition to the income from permanent investments. Whether the people shall get "value received" for this amount, depends almost entirely upon the qualifications of the teacher for his work. Many teachers, from want of scholarship and of a knowledge of how to teach, work a positive injury, instead of a benefit, to the children under their charge. The money paid to them yields no valuable return. If teachers would continue in the profession during a long series of years, the great necessity for Normal School instruction would in time disappear. But the fact is, that twenty-five per cent. of the teachers of the State leave the business of teaching every year. Their places must be filled by new and inexperienced teachers. The average time spent by any one person in teaching is four years. There is, therefore, no possibility for our schools to become filled with teachers who have learned from experience what it is the business of the Normal School to teach. Hence the necessity that every teacher obtain this knowledge before beginning to teach, if the public shall receive adequate returns for the money expended.

ONE-TERM STUDENTS.

About sixty per cent. of the students who enter the State Normal School attend but a single term. A larger number of this class attend in the spring, and a special course of instruction has been arranged for them. The time is too short to give more than a hasty review of the branches taught; but some very valuable instruction can be given in that time in the Science and Art of Teaching. Much will be accomplished if these teachers shall learn the principles involved in the instruction and government of a school, and shall be induced to look for and apply these principles in their teaching. Much of the haste and inconsiderateness of the work done in the schools will thus be avoided, and a new direction will be given to the thought of the teacher, which must result in steadier and more systematic effort. It is probable that in the future it may be necessary to provide for such a class of teachers at the beginning of each term.

COURSE OF STUDY.

The course of instruction has been prepared with great care, and revisions have been made from time to time, as experience and

progress in the educational work in the State have demanded. All such changes should be made only after careful study and mature deliberation. The institution has a high reputation in the State for thorough, honest work. The best interests of the common schools require that this reputation be maintained. I think that the time has come when more attention can be given to methods of instruction and of school management, without lowering the standard of thoroughness heretofore maintained. This, as has been said above, is the distinctive work of the Normal School, and every student should receive, not only thorough instruction in the principles upon which all methods should be based, but he should have a practical knowledge of "how to do it."

COUNTY INSTITUTES.

In every county in the State a Teachers' Institute is held each year. This institute is in session five days. An opportunity is here afforded to give much valuable assistance to the common school teacher. Different members of the faculty have given instruction in these, from time to time, as their other duties have permitted. Since the 25th day of August last I have attended institutes in sixteen counties, working from one to two days in each, and have addressed about 2,500 teachers upon the relation of the Normal School to the common schools. I find everywhere a hearty friendship and good-will for this Institution.

Since the last report was made to the Board, some important changes have taken place in the faculty. The President, Mr. W. A. Jones, who, ten years ago, organized the school, and under whose direction it has come to be recognized by educators in every part of the country as one of the best Normal Schools in the Union, has been compelled to sever his relations with the Institution because of failing health. Miss Bruce, who has been a member of the faculty from the organization of the School, and has done most excellent work in her department, has resigned for a similar reason.

They have both done much for the State, and have exerted a strong influence in elevating the standard of educational work. Their loss will be severely felt.

President of the Faculty.

TRUSTEES' REPORT.

To His Excellency, JAMES D. WILLIAMS,
Governor of Indiana :

The Board of Trustees of the Asylum for Feeble-Minded Children beg leave to submit this, their first annual report, as required by the act establishing this institution :

As our State has been slower than our neighboring States in providing for the unfortunate class which is here to receive training and instruction, many of our citizens do not understand the necessity for such an asylum, or the good results to be accomplished by it. This necessary information we are endeavoring to diffuse throughout the State by the aid of the press and mails. That we may inform some through this report, whose attention may not be otherwise reached, permit us to say that the insane or the idiot child, or those who are becoming such through epilepsy, are not to be here received, the hospital being their appropriate place ; but all that large class of children, beginning with those who are turned away from the common schools because of incapacity to receive instruction given there, and on through all the lower grades of intellect until those are reached and included who can barely distinguish the difference between persons, objects or colors ; in short, for the

FEEBLE-MINDED,

and not those destitute of mind or capacity.

The act establishing the institution requires of the Board that they should be ready to receive inmates or pupils by the 1st of November, and in answer to notice of readiness to receive pupils, we have just had at our monthly session of the Board nine applications, and

have such knowledge of others desiring to apply that we anticipate at an early day to have one division of pupils under instruction.

We have secured Miss Carrie Wicks, a lady of experience, in this department, to take charge of the first division, with whom will be associated Mrs. Sallie J. Lewis, who has been preparing herself for this specialty, who will be ready to take charge of the second division as soon as the numbers warrant.

We shall prepare for and expect to receive eighty pupils by the time of our next annual report.

On coming into this trust, your Board gave much deliberate consideration to the best plan for carrying out the wishes of the Legislature. In order to do so on such a basis as would squander no money in temporary expediences, either in buildings, fixtures or help, we have sought to so thoroughly inform ourselves as to what was needed as to make the most judicious expenditures practical in every department, believing that to be true economy for the State.

We found, on bringing into use some portion of the recently built Home which would doubtless never be needed for the orphans, as their numbers will of necessity decrease, that we could use a number of rooms for feeble-minded, and, by extending the building by a wing to correspond with the one on the north side of the building, that the cooking for both classes could be done more cheaply and their tables could be more cheaply served than if separated in distant buildings, and that the division of the children, under proper discipline, could be as perfect as though their buildings were separated; thus permanency would be stamped on every expenditure.

When these improvements are completed, the buildings will be used by both institutions with great economy of officers and employes, and will show the wisdom of the Legislature in combining them.

The expenditures so far have been merely nominal, as will be seen by the Treasurer's report, on a following page.

THE SOLDIERS' ORPHANS' HOME.

The care, management and control of the Soldiers' Orphans' Home being placed in the hands of your Board (by subrogation the duties and rights of the former board became ours), and we report

for the past year, though but a part of its operations have been directed by us. The report of Superintendent Hunt to us gives the necessary information in very well chosen words, and we call your attention to it as embodying a full statement. In calling attention to the numbers of the wards of the State here finding a home, we have this statement to make: that since the buildings were burned, in September, 1877, until the present Board came into control, there was no regular system of books kept, the former Board not feeling warranted in the necessary expense, there being no suitable safe, desks or books. We have found it exceedingly difficult to obtain satisfactory information with regard to the inmates of the Home, as well those in the building as those who are at their homes at transient times visiting friends, or who are at homes on trial. We have had this matter in hand, and as soon as we can get together the necessary information, we shall have of record as specific a statement as we can obtain of every ward of the State in our charge.

There is great inequality as between the different counties of the State as to the benefits each are receiving from the Home, the contiguous counties having much the greater share of the advantages; but as there is abundant room, and ample provision has been made by the Legislature, no properly accredited applicant has been rejected since this Board assumed control. There is a class of children which has been admitted into the Home from time to time who have no legal rights therein, for whom we have been endeavoring to find homes in families, not feeling warranted in debarring them from privileges they are already in possession of by casting them out without provision being made for them. We refer to children who have fathers living. We feel warranted in saying that there are many cases among these children whose fathers *are* living, that not only patriotism but humanity would demand that the children be retained, and other applications of like character granted, if there was legal right to do so; and an amendment giving the Board or a civil judge discretion in such cases is strongly recommended by us.

The expenditures are fully given by the Superintendent, but from the fact that no separate and full accounts of bills were kept before April, we can not separate the charges before that date, so as to give the classes of expenditures as we are able to since. The payments for seven months just closed are given as follows:

Expenses for support of table	\$2,948 85
Expenses for clothing	1,469 72
Expenses for fuel and lights	819 90
Expenses for farm	605 59
Expenses for ordinary repairs	40 15
Expenses for office	140 52
Expenses for salaries and employes	4,835 70
Expenses for other general purposes	1,836 02
Paid for furnishing buildings	665 94
Paid for buildings and improvements	6,314 66
<hr/>	
Total	\$19,677 05
Less furnishing and building and improvements	6,980 60
<hr/>	
Total expenses	<u><u>\$12,696 45</u></u>

Being less than \$2,000 per month for the ordinary expenses of all kinds.

Much stress is laid on the poor ventilation of the building in the report of the Superintendent. The Board found, on their first examination of the building, that it was not as thoroughly ventilated as it should be, it being occupied by so many persons; but arranging for, it was hoped, as near a perfect ventilation as possible in the new extension, it was their intention after its completion to remedy the defect, as far as practicable, in the other part of the building.

The building being heated by steam, and the water, in great measure, taken from the mineral spring on the premises, we have found that, though the boiler and pipes have been in use a comparatively short time, yet they are greatly injured, and would soon be useless if the same water is continued. We have caused to be built a large cistern, to contain nearly one thousand barrels, and may yet find it necessary to increase the cistern capacity so as to use soft water for the boiler and pipes, or else a very heavy expense would be soon entailed for renewal.

The schools are doing very creditable work, but it is not practicable to grade the advanced scholars in as many classes as would be the most advantageous for them, the primary classes being so very

much the largest. A very large number of the children in the Home being too young for ordinary teaching, the employment of a kindergarten teacher is favorably thought of by the Board.

SUPERINTENDENT'S REPORT.

INDIANA SOLDIERS' ORPHANS' HOME
AND ASYLUM FOR FEEBLE MINDED CHILDREN,
KNIGHTSTOWN, IND., October 31, 1879.

To the Board of Trustees:

GENTLEMEN—I herewith submit, in accordance with law, a report of the condition and affairs of said Institution for the year ending October 31, 1879, being the twelfth annual report of the Soldiers' Orphans' Home.

It is hardly necessary for me to remind the Board of the fact that so much of this report as relates to the time embraced between October 31, 1878, and the last of May, 1879, is taken from the monthly statements and such other papers and memoranda as were furnished me by my predecessor in office; the balance of the report, of course, embracing the time the Institution has been under my charge, to-wit: from the last of May, 1879, to the present date.

NUMBER OF INMATES.

By reference to the last annual report by my predecessor it will be seen that there were two hundred and fifty-nine (259) names of inmates on the rolls of the Institution. When I assumed charge there were one hundred and ninety-nine (199) reported to me as actually present in the Home. Since that time there have been received twenty (20) children. It might be proper here to explain that there have been none discharged since, only in this wise, viz: During the annual vacation it was discovered that there were a number of children here without authority of law; that is, who had fathers living, and such were at once notified that they could not be again received into the Institution after having voluntarily gone to their homes. Of this class thus disposed of there

were quite a number. Besides these, there have been ten (10) provided with good homes, it having been our special aim to secure for every child possible an opportunity to be reared and trained under the influences of home life. To this end quite a number are away at temporary homes on trial at the present time. It might be well, however, to add that not enough have been so disposed of to account for the difference between the number reported as turned over to my care, and actually received since, and the number now remaining.

HEALTH OF INMATES AND SUGGESTIONS IN RELATION THERETO.

The health of the institution prior to June 1, I can not, of course, report upon, there being no record accessible at this time, but there have been no deaths in the past year. Since the present management began, especially during July and August, the health of the inmates was bad, owing very much, if not altogether, to the lack of sanitary precautions and unfavorable surroundings, noticeably improper ventilation and too close proximity of the privy and garbage vaults, which latter could not be remedied by any ordinary process of disinfection, and were therefore removed entirely to a safe distance, and, of course, as will elsewhere appear, at no little expense. As soon, therefore, as the causes were removed, the health of the institution improved, and is now as good as can be expected with the imperfect ventilation of the building and the cellar. And while on the subject I can not pass the occasion without respectfully urging the necessity of better ventilation of the building proper, and especially the cellar, which latter can be in a great measure secured without much expense, by simply removing the bakery from across the road into the cellar. As there must soon be a new oven, its presence in the cellar, with the baking done there, would be a saving in fuel, labor, etc., aside from its great value in removing the damp, mouldy and unhealthy conditions of the atmosphere, all of which could be still further improved by frequent openings into the cellar, especially on the west side, thus allowing free and active circulation of the atmosphere under all parts of the building.

EDUCATIONAL.

The schools have been kept up as heretofore, under the management of Miss Bonfoy, Mrs. Lewis and Miss Wicks as teachers, who are not only competent, but take a commendable interest in their work. The children seem to be making reasonable advancement, and so far as I have had time and opportunity to observe, this department is showing satisfactory results.

THE FARM.

The farm has been very skillfully and successfully managed under the amiable and patient care and industry of Mr. James Daugherty, who has no assistance to speak of except help from the larger boys in the institution, with whose aid, cheerfully rendered, he has saved the State from any expense whatever on account of vegetables for the subsistence of the institution. In the one item of potatoes alone they have furnished plenty for use, and have now dug and prepared for hilling up over 1,000 bushels, besides having ample of all other kinds to do us through winter.

In concluding this brief and may be imperfect report of general topics, I will only add that the Home, as now organized, is officered as follows:

1. Dr. Aaron Wood, Moral Instructor.
2. Mrs. L. B. J. Wishard, Matron.
3. William M. Provine, Office Assistant.
4. Miss Sarah Bonfoy, Principal Teacher.
5. Miss Carrie Wicks, Teacher.
6. Mrs. Sallie J. Lewis, Teacher.
7. Mrs. S. D. Hamilton, Governess of Girls.
8. Miss Mary Stowhig, Governess of Girls.
9. Miss K. B. Thomas, Governess of Boys.
10. Miss Ada B. Dorwin, Governess of Boys.
11. Miss Florence Davis, Governess of Boys.
12. Miss Mary Aydelotte, Governess of Boys.
13. Miss Jennie Millikan, Dining Room.

14. Miss Florence Hunt, Dining Room.
15. Mrs. Lucinda Traylor, Cook.
16. Miss Ella Traylor, Cook.
17. Miss Ruth A. Mitchell, Seamstress.
18. Mrs. Anna Byerly, Seamstress.
19. John Harrison, Laundry.
20. Mrs. James Daugherty, Laundry.
21. Mrs. Sarah Cox, Laundry.
22. William Casely, Engineer.
23. William Perkey, Baker.
24. John Fowls, Market Boy.
25. Miss Alice Myers, Nurse, etc.

FINANCIAL STATEMENT.

In the following detailed statement of current monthly expenses, it will be observed that I have not charged myself with any money received from the State or otherwise, on account of the Institution, for the reason that I have drawn none, as you are aware; the payments that have been made by me being in the amounts specified and furnished by the Treasurer of your Board, he sometimes making the payments himself direct.

The ensuing exhibit, however, is an accurate showing of the expenses per month, since the control of the Institution passed into my hands, for the payment of every dollar of which proper vouchers are herewith filed; and it presents also such a statement for so much of the year as my predecessor was in office, as the records in my hands disclose.

In justice to myself, I can not conclude this report without referring to the fact that, while the average expenses of the Soldiers' Home, as here shown, are apparently as large as in former years, yet there is included in this account the sum of about \$6,000 expended in the construction of the extension of the main building, for cisterns, water piping, tools, labor and materials for improvements about the premises and farm, and for milch cows, items which do not belong to, and are not a part of, the ordinary expenses proper of the Institution; deducting which will show at least a fair reduction in the actual expense of its management:

MORAL INSTRUCTOR'S REPORT.

To the Honorable Board of Trustees of the Indiana Soldiers' Orphans' Home and Asylum for Feeble-Minded Children:

It is with satisfaction that I am able to report the prosperity of the schools now in progress for the benefit of the children in this Home—especially as connected with the services, devotional and educational, on the Sabbath day.

At nine o'clock A. M., the children are seated in the chapel, and, after singing and prayer, are engaged in Bible study one hour, when there is a recess of forty minutes, after which they return, by divisions, to the chapel for religious services appropriate for the day.

I have, during the month, instead of repeating hortatory platitudes on minor morals, given geographic, biographic and chronologic factors in object lessons on the blackboard, impressing the memory, pleasing the fancy, and aiding apprehension of Bible truths; which will in due time take root in the conscience of such as know the Scriptures in childhood, laying a foundation for unfeigned faith.

I am aware that in an eleemosynary institution, supported by civil and not ecclesiastical endowment, religious teaching should not be denominational; hence the forms of service must consist of Scriptural phraseology in its self-evidencing power on the human mind.

By the assistance of Miss Davis, we have kept up the singing in all the chapel services, not only on the Sabbath, but at the evening collections for prayer.

There is also one hour of Sunday afternoon spent in the school-

rooms, given to singing, and reading moral essays by the teachers of the week-day schools. And I must say, to the credit of these teachers, that the order in the chapel services has been improved by the training of the scholars during the week. And however gregarious it may seem to march these orphans by pairs and divisions to the form of religious devotion, yet I see no other means of securing the quiet and order necessary for their proper training in the way they should go, for "a child left to himself bringeth shame." (Prov. xxix: 15.) And knowing, as I do, that bad men are but "grown up boys," I see the importance of early restraint, and feel the responsibility of the opportunity placed in my hands of uniting with you in utilizing all possible resources for lifting these wards of the State to a higher plane of manly citizenship.

The liberal supply of requisites furnished by your Board, the unrestrained approbation of your Superintendent, and the co-operation of the Matron, governesses and teachers in all things appertaining to the moral instruction of the children committed to my care, have greatly aided me in this work. But even here we are apt to make our presence more perfunctionary than per se; and lose the force of personal example and experience which is the great power over the young mind.

In conclusion, permit me to say my wife joins me in expressions of satisfaction with the sanitary, social and official surroundings of our present appointment. And, having an abiding confidence in the contingency of prayer, not only for personal grace, but also for special providence, we assure you of our daily orisons for the blessings of God on our united responsibilities.

Respectfully, yours,

AARON WOOD,

Moral Instructor.

We may congratulate your Excellency and the State upon the present condition of the Institution, morally, religiously and financially.

The moral deportment was never better. The inmates, for the most part, render cheerful obedience to the rules and regulations of the Institution, and submit to the needed discipline quite as readily as could be expected of persons of their rank and capabilities.

In the Reformatory Department a small room has been set apart for the most refractory. Confinement in this for a few days, on lessened diet, is the extremity of punishment, and this has been rarely needed.

In the Penal Department a window has been placed in the dark cell, believing that separate confinement would be more beneficial and reformatory in its results than darkness. Our experience being that, on *women*, the dark cell has a hardening, rather than a reformatory tendency. Separate confinement, on bread and water, is the severest punishment that our Superintendent is allowed to inflict without an order from the Board. In but one instance has this order been called for.

The religious interest has been quite as well maintained as in previous years. Much care is used in their religious training and moral culture, with greater and more enduring results than in for-

mer years, our officers, from past experience and close observation, being better qualified to adapt the instruction and training to meet the needs of each case as developed.

By the report of the Superintendent, annexed, you will observe that the Educational Department in the Reformatory, as well as the Prison, has received due attention, and their advance has been quite encouraging; but, owing to reasons therein stated, the schools have been for a portion of the year suspended.

The finances of the institution, we believe, have been wisely and economically managed. The Legislature, having been informed of the actual expense of supporting the institution, made an appropriation of \$21,500 for the years 1879, 1880 and 1881. According to the law, the Superintendent, at the close of each month, furnishes to the Board an itemized statement of her receipts and expenditures. The bills of each month are carefully examined, and when approved are forwarded to the Board of Audit for their examination and sanction, accompanied by a draft on the treasury for the amount thereof.

In order to bring our expenses within the limits of the appropriation, we have been obliged to dispose of inmates of the Reformatory Department more rapidly than has proved beneficial to the girls or to the community from whence they came. Protestations and petitions have been received urging the retention of the girls for a longer period, that their reformation might be more thorough, but we can not respond favorably to the complaints without incurring indebtedness, which we do not propose to do. The expense of living is rapidly increasing, and we fear we shall not be able to maintain even so large a family the coming year, but we shall do the best we can for the interests of all.

A faithful and correct account of our expenditures will be found appended in the Superintendent's Report.

IMPROVEMENTS AND REPAIRS.

A substantial wooden fence has been constructed upon the north side of the main building for the purpose of cutting off pasture for our cows. A fire-escape stairway has been erected on the west end of the Girls' Reformatory, which, we think, increases the safety of the inmates in case of fire. We have also caused to be built, from the same fund, a chicken-house, hog-pen, an addition to the engine-

house, and the repairing of the boiler, a necessity, both for safety and economy.

In order to secure more thoroughly the safety of the prisoners, and avoid the evil effects which might arise from the inmates of the Reformatory coming in contact in any way or associating with the convicts, it was decided to erect two wash houses—one connected with the Penal Department, and the other with the Reformatory. An architect was employed to devise a plan and specifications, and his services secured for the oversight of the work; advertisements were made for sealed proposals, and the contract was awarded to the lowest bidder. The buildings are now in process of erection, and, we trust, will be completed and ready for occupancy by the first of the year.

The expenditures thus far made from the appropriation for repairs, improvements, etc., and the contracts awarded, but not completed, will appear from the following statement of contracts and expenditures:

SEWERAGE.

We have been unable to effect any arrangement in regard to the sewerage, owing to the refusal of the City Council to permit us to connect with any of the sewers of the city. From the location of our premises, there seems to be no other outlet for our drainage, except in connection with the city sewerage. By the report of the Superintendent, it will be observed that we have been actively and persistently at work with the City Council, and otherwise, but as yet without success, and remain to-day, as at first, surrounded with perplexities and annoyances. The funds appropriated by our last Legislature have been preserved intact, hoping for some new development whereby we may be able to secure a complete system of sewerage.

As required by section 31 of the act of May 13, 1869, the Board has estimated and determined "the actual expense per annum of clothing and subsisting an infant committed to the Reformatory Department of the Institution," and has fixed the amount thereof at \$146.

By reference to the Physician's Report, you will note that we have been visited with an epidemic, exceeding in severity anything before experienced, more or less affecting many of the girls, and several of our officers as well; but owing to the untiring devotion and watchful care of the physician and officers, the epidemic was arrested on the Reformatory side, none of the convicts being affected. We feel that we can not commend too highly our officers for their unwearied watching night and day with the sick and suffering.

The industries of the institution have been carefully looked after, and made as useful and productive as possible. The convicts are engaged in laundry work, knitting, general sewing, etc.; the girls in cane-seating chairs, laundry work, knitting, sewing, and obtaining a general knowledge of house-work. It is difficult to make their labor remunerative. We believe it more important and economical to train them in various kinds of housewifery. By this means we are able to dispose of them to better advantage, and with more hope of permanent reformation. The inmates are required to cultivate the grounds, attend to the horses, cows and hogs, keep the stable and other out-houses in order, and do all the work about

the Institution that can be done without skilled workmanship. This kind of work is very much enjoyed by them, and the privilege granted as a reward for good conduct.

The discipline is kind, but firm, and we believe that all of the officers are conscientiously engaged in their work, and seek to do it faithfully, looking to the good of the inmates and the best interests of the State.

Respectfully submitted,

RHODA M. COFFIN,
ELIZA C. HENDRICKS,
EMILY A. ROACHE.

SUPERINTENDENT'S REPORT.

REFORMATORY INSTITUTION,
INDIANAPOLIS, IND., November 1, 1879.

To the Board of Managers :

LADIES:—The record of another year can not be entered upon without gratitude to our Heavenly Father for permitting so rich a blessing to rest upon our labors.

As our experience becomes matured, we are better able to cope with the wayward and incorrigible—those who have no will except self-will—and are often surprised at the ready compliance to rules, judiciously planned and firmly executed, even in those who have long bid defiance to parental authority.

We find regular work the greatest help to reformation of character, and no work more beneficial than that which qualifies them for household duties. Many of them have the false idea that it is “degrading,” that by following some trade they can dress better, and have more leisure, which too often proves their downfall. The laundry seems to be the most practical; homes have been more readily obtained by our out-going inmates when proficient in that department.

REFORMATORY DEPARTMENT.

Our “ticket-of-leave” system has proved invaluable, giving us greater power over the girls on their first entering service, and the knowledge that a failure will bring them back to the Institution makes them more anxious to succeed.

We sympathize with those who are willing to help forward the work we have begun, well knowing that it takes long patience ere the work proves satisfactory, but the thought that a poor, motherless girl is being helped to make an honest living is a rich reward even to those not called to labor in a public institution.

The Savior said, "In as much as ye did it unto the least, ye did unto Me."

Few come to us who have received even a common school education, proving the long admitted theory, "Ignorance is the mother of vice;" hence we strive to give to them as good an education as the time and their abilities will admit.

The teachers' report indicates as good progress as other schools of the same grade. They are greatly interested in good books. The evening reading is looked forward to with much pleasure, and we regret our inability to replenish our worn-out library, realizing that food for the mind and morals must go hand in hand with religion to effect reformation.

The death of Ellen Geryum, from consumption, had a marked effect on the family. Her life had been degraded, but her death was beautiful, proving the fullness of the Savior's power to save the fallen. Her gratitude for kindness shown was unbounded. Even the gift of a flower seemed to lighten the pathway to the valley of death, of which, as she entered, she said: "I do not feel afraid; I shall go to sleep and wake with Jesus and my mother."

The Physician's Report contains the account of the severe trial of typhoid fever. School and work for patrons was suspended, the officers devoting themselves night and day to the sick; and I can truly say that, had the sufferers been their own children, they could not have been better cared for; nor do I think a band of more willing, self-sacrificing helpers could have been found.

PENAL DEPARTMENT.

For some unexplained reason this department decreases in numbers. It may be from so small a portion of recommitments and the gratifying per cent. of the past year.

Many of those discharged are living in families and giving good satisfaction. Some have married and are doing well, and visit the home that rescued them with evident satisfaction, and their hearty "God bless you!" often relieves us of anxious fears.

We do not deny that our hearts have been saddened by the ingratitude of some—from whom we had hoped better things—who have again entered a life of sin. Yet, remembering that society has sifted and condemned the class for whom we labor, as unfit for liberty, though they sometimes fall, we have faith that the seed

sown will be watered by Him who left the grand lesson, and left it because He knew its need, "not only seven times, but seventy times seven."

The laundry continues the principal employment for those capable of "hard labor;" knitting and sewing for the older and less able.

As regular employment is an absolute necessity, we still work for very small remuneration. Their willingness to work is very gratifying. Seldom do we have to punish for idleness; punishment is reserved for outbreaks of uncontrolled temper, which often makes them dangerous until changed by the power of Grace.

One poor woman hung herself after being with us but three days, an opium-eater for many years.

To our friends, Wilson Morrow and Dr. Woods, with other Christian workers whom they have interested in the work, and who have so long, faithfully and earnestly preached the gospel of life and salvation, we most sincerely tender our thanks, and give them the assurance that their labors have been instrumental in saving many souls that will one day call them blessed.

By the assiduous attentions of our sympathizing physician, Dr. Parvin, especially during the epidemic, many that seemed for days at the point of death were restored, greatly increasing our confidence and obligation.

The question of sewerage remains a source of annoyance. Notwithstanding the Legislature granted the necessary funds for its construction, we have been unable to obtain permission of the City Council and Board of Aldermen, although they have been appealed to by the Board, by individuals, and our attorneys having the matter of the suit against us in charge. As ordered by the Board, the house-drainage was disconnected from the Laundry waste-water, and is now discharged into a cesspool, whence it is taken by contract, and only the waste from wash-water now empties into Crooked run. But this does not remedy the trouble, and the necessity for sewerage still remains.

The fire-escape stairway was built in the west end of the Reformatory Department, and, in the way of repairs, the engine-house was enlarged and boilers thoroughly overhauled and reset. A fence was built; the roof and all needful repairs kept up. Additions for wash, iron and dry rooms were undertaken, consisting, on each side, of two rooms, 18x57 feet, and 26x50 feet. The entire cost of this

improvement, to date, as per contracts entered into, is \$6,412.45. Of the appropriation for special purposes made by last Legislature, \$5,000, will be reserved for sewerage.

An inventory of all property belonging to the State has been taken. For this, and all financial and statistical items, I refer you to the Secretary's Report; also the Steward's for statement of cash received and disbursed by him. I need not repeat to you the great responsibility felt in expending the public moneys, in properly providing for the family, in the additional building and repairs; but your always ready counsel, sympathy and advice, the courtesy shown by the Governor and State officers, let me assure you, have been highly appreciated.

Yours respectfully,

SARAH J. SMITH,

Superintendent.

PHYSICIAN'S REPORT.

INDIANAPOLIS, October 27, 1879.

*To the Managers of the Indiana Reformatory
Institution for Women and Girls :*

LADIES: There have been three deaths in the Reformatory during the official year.

On June 1, Margaret Conrad, a prisoner, committed suicide.

May 1, Ellen Gwynn died, after some months illness, of pulmonary consumption.

On the 21st of August, Stella Walker died of typhoid fever. These two were in the Reform Department.

An outbreak of typhoid fever is a part of the medical history of this year. On June 28 the first case of typhoid fever occurred; the subject, Mary Mansfield, having been here for three years, so that the disease could not have been brought by her from without. This patient recovered in about four weeks. The next attacked was Stella Walker, her sickness dating from the 12th of August. Hemorrhage from the stomach caused her death, after nine days confinement to bed. The next case was observed on the 31st of August, and during the two first weeks of September several others were taken sick. There were, in all, thirty-five cases of a continued fever, sixteen of them presenting unequivocal evidence of typhoid fever, and convalescence not commencing until from three to six weeks, while the nineteen others were not ill enough to be confined to the bed longer than a week or ten days. The probability is that most of these cases of illness depended upon a common cause, and that really many of those who were up so soon were what has been termed walking cases of typhoid fever.

What the cause of the general sickness was, admits of a plain,

though only a partial solution. The fact of its being limited to the Reformatory Department proved that the cause was similarly restricted. That cause was in the water from the well, used especially by the children during the hot weather; for, in addition to the fact that none were sick but those who drank from it, a partial examination of the water by my friend, Professor Van Nuys, of the State University, one of the most accomplished chemists in Indiana or in the United States, has proved that it contained a large quantity of organic matter, and is not suitable for drinking. Professor Van Nuys is continuing his investigation, making a thorough chemical and microscopic examination of the water, and the results, I have reason to believe, will be of value to the Institution, to medical science, and to the public.

Undoubtedly it is not too much to assert that the water was the means of conveyance of the typhoid poison; but how the typhoid poison reached the water is a question to which, so far, I have not found even a probable solution.

I can not conclude my report without commending, gratefully and heartily, the kind and assiduous attentions of the officers of the Institution to the sick. So, too, similar attentions were given by the girls who acted as nurses, and to their unwearied fidelity and watchfulness and careful nursing, the willing work of willing hands, is to be attributed the very light mortality of typhoid fever in the Reformatory.

Yours respectfully,

THEOPHILUS PARVIN,

Physician.

COMMISSIONERS' REPORT.

To His Excellency, JAMES D. WILLIAMS,
Governor of Indiana :

The ninth section of the law organizing the House of Refuge requires the Commissioners to make to the Governor a full and detailed report of their doings as such Commissioners, and of the expense of the Institution, with such other information relating thereto as may be interesting or useful to the people of the State, and in compliance with the law, the Board submits, this, the thirteenth annual report.

By the terms of the law, the Board is responsible for the management of the Institution, and the members of the Board, fully recognizing this obligation, have felt that they could not fully discharge the duties of their trust by meeting once a month and auditing the accounts of the Superintendent, but have deemed it their duty to familiarize themselves with all the details of the management of the Institution.

It is well known that a Board which only makes monthly visits, at stated times, to an institution to audit accounts, knows little or nothing of the true condition of the trust in its keeping.

It was not until March 8, 1867, that the Legislature exercised the power conferred by the constitution to establish "a house of refuge for the correction and reformation of juvenile offenders."

On the 1st of January, 1868, the Institution was opened for the reception of inmates.

THE PROVISIONS OF THE LAW.

Our constitution, it will be noticed, authorizes the establishment of houses of refuge for *juvenile offenders*. It was never contemplated that the State should maintain orphan asylums.

The organic law of the Institution, judging from some provisions found in it, was evidently copied from the statutes of some other State, and this will doubtless account for the liberal provisions made for the commitment of boys. The Board calls attention to the law for the reason that it has found that the House of Refuge has been a convenient place to consign boys who are orphans, or boys whose fathers or mothers have married again. The Board has found boys in the Institution that came from orphan asylums, and others sent by parents, who gave no evidence, after they reached the Institution, that they had ever been juvenile offenders.

Sending children of that character to the Institution is doing them gross injustice, and at the same time the State and counties are frequently charged with the support of children who should be taken care of by their parents.

The Board can not refuse admission to a boy, when regularly committed, but during the past year it has taken some pains to examine the true reason for sending the boys, and in several instances have discharged children who were not juvenile offenders, but were sent by heartless parents to get them out of the way.

AN AMENDMENT OF THE LAW.

The law organizing the Institution fixed no minimum age at which boys should be admitted. There were children in the Institution who could be called infants, in the popular acceptance of the term, being only four, five and six years old. These infants required much attention and care on the part of the officers, and were not juvenile offenders. It was a great misfortune for children of such a tender age to be sent to a place which was intended only for bad boys.

With a view of curing some defects in the law, the President of the Board prepared a bill and submitted it to the Legislature, limiting the admission of boys to those between the ages of seven and sixteen, and also requiring a written complaint to be filed stating

the reasons why the boy should be committed, and proof made of the matters contained in the complaint. The Legislature, in its wisdom, amended the bill by fixing the maximum age at eighteen. It is very questionable whether this amendment was a wise one. There are cases where boys over the age of sixteen have been guilty of crime under such circumstances that they are entitled to sympathy and a mitigation of punishment, but their cases should be presented to the Governor to commute the punishment if he thought proper. But so long as the law provides that boys who have committed no crime, but are merely incorrigible, or have no suitable homes, may be sent to the Institution, it is very questionable whether boys between the ages of sixteen and eighteen who are old in crime should also be admitted.

In the families the larger boys are separated from the small ones, and the bad boys from the good ones, but in the workshop and on the farm this distinction can not always be maintained. The constitution contemplates an institution for bad boys who have offended against the laws of the State, and, as with the increase of population the number of bad boys will also doubtless increase, it is a question seriously to be considered whether the Institution should not be restricted to the admission of that class. The Institution is in its infancy, and the attention of the Legislature should be called to the law, and the whole question thoroughly considered.

NUMBER OF BOYS IN INSTITUTION.

There have been received since the opening 1,235 boys. There were 107 received during the past year, being 38 less than in the preceding year. This decrease, taken in connection with the fact that there has also been a decrease in the number committed to the two State prisons, would indicate that society is improving in our State, and is a matter for congratulation.

Until the past year, the number of boys in the Institution has gradually increased each year. We commenced the year with 383 boys, and closed with 330. A larger number of boys were granted tickets-of-leave during the year than ever before in the same length of time. There were a number of boys who had been in the Institution for years. Some of them had no parents or friends, and the Board passed an order that the Superintendent should make an effort to secure homes for all boys who had a number under 500.

Homes have not been secured for all, and there are some thirty boys who have been in the Institution a long time, are reformed, and have no homes to go to. They will go to school this winter, and in the spring we hope to find them homes with farmers. If we are successful in this, the number can probably be kept down to the present figures.

ESCAPES.

So long as the Institution is conducted upon the present plan as an open reformatory, some escapes may be expected. There is no high fence or wall around the grounds, no bars on the windows, nothing, in fact, to remind the visitor of a prison. All the boys do not work under the eye of an officer. Some are placed upon their honor, and occasionally a boy will violate his honor and escape. There were sixteen escapes during the year, being a much less number than usual. We attribute this to the fact that the Board granted tickets to boys who had been long in the Institution, and had a good record. Experience teaches that, after a boy has obeyed all the rules, obtains his honor and retains it a long time, he finally becomes discouraged if he is not released, and will seek an opportunity and run away. The records show that, in past years, many boys who escaped had their honor and had held it for a long time.

PUNISHMENTS.

The bread and water line has been abolished, and the boys that require punishment get the rod. All inflictions of this ancient instrument of correction are required to be reported to the Board at each monthly meeting. The punishments are inflicted by the House-Fathers, and the reports are filed away. This plan of requiring reports to be made to the Board has worked well, and we no longer hear complaints of the punishments, for they are mild, and the rod is not often used.

THE DISCHARGED BOYS.

The law makes no provision for paying a boy anything when discharged. Many of them come from the families of the poor, and some have no relatives or friends. His home is frequently in a distant part of the State, and after his discharge he must wait until relatives or friends send him money to reach it. A boy who has

worked faithfully during his stay in the Institution, and by his good conduct has merited his discharge, should not be turned out without a cent in his pocket. The Board has ordered that every discharged boy shall have a substantial suit of new clothes, and the large number discharged during the year will account for the increase in the expenditure for clothing. It is gratifying to hear that a large majority of the boys discharged are doing well. Some have fallen, and are now inmates of the State prisons.

It can hardly be expected that all will be saved, for some have inherited criminal natures, and, although they give good evidence of reformation before leaving the Institution, they fall into old habits when the restraint is removed, and again enter upon a life of crime.

It might be well to amend the law so as to make it the duty of some county officer to look after the discharged boys, and make reports to the Board. If such reports were made, they would have a restraining influence upon the boys, and the Board would be enabled to report with some certainty the good which the Institution has accomplished. When the Board is informed that discharged boys are not doing well, their tickets are revoked, and they are brought back.

GOVERNMENT.

It is no easy task to govern a bad boy, and there are comparatively few who understand the art. The members of the Board are fully impressed with the delicate and responsible position in which they are placed; for the proper care, education and government of boys is a trust of the highest and most sacred character, and is not lightly to be assumed. Most of the boys are in the Institution by reason of the neglect or incompetency of some one. The officers are to take the place of parents. The government should not be too rigid, but kind and firm. The better nature of the boy must be addressed. The first thing to be done is to improve his physical condition, which a life of crime usually degrades. He must have a clean place to sleep, wholesome food, and be comfortably and plainly clothed. He can only be conquered by love and kindness, and an officer who does not understand how to use these formidable means of reformation should not be in a reform school. The boy's pride should be cultivated, and the Board propose to introduce some mil-

itary features in the Institution, which it is expected will do this, and also aid in the government. The boys must be instructed, interested, and amused, so that new thoughts will take possession of their minds, and then their government will be an easy matter.

REPAIRS AND IMPROVEMENTS.

The Legislature makes no appropriation for current repairs, and the Board has to draw on the General Fund for such repairs and improvements as are necessary. The Chapel was completed before the close of the year ending October 31, 1878, but all the bills were not paid. These have all been settled, and, in addition, seats for the Chapel were purchased and paid for during the year. The roof on the workshop, a building 100 by 50 feet, was leaking badly, and it has been replaced with an iron one. The lightning-rod on the shop was old and dangerous, and this was also replaced with a new one. The Board felt that it must defer to the popular belief that rods are a protection, for if the building should be struck while filled with boys, and no rods were on it, the Board would be held censurable. There are six two-story brick family houses, a large main building, hospital, chapel, workshop, barn and several small buildings that are to be kept in repair, and this necessarily requires a considerable outlay.

BUILDINGS.

All the buildings are in good condition, except the barn, which had to be propped on the side to keep it from spreading and falling down. It should be replaced with a new one. The large number of boys in the Institution required the Board to provide a more commodious dining hall, and the first floor of one of the family buildings was appropriated. It is not very well adapted to the purpose, and there is urgent need for a dining hall commodious enough to seat all the boys without crowding. One important part of a boy's education is to teach him table manners, and this can not be very successfully accomplished in a crowded dining room. There is room for improvement in the table manners of the boys.

SCHOOLS.

The Board has determined that there shall be more attention paid to the schooling of the boys in the future. There are four schools in operation, and all the boys are required to attend half a day. Those who attend school in the morning, work in the afternoon; and those who work in the morning, attend school in the afternoon. The education of nearly all the boys committed has been sadly neglected, and the Board proposes that they shall not leave the Institution without being able to read and write.

LIBRARY.

There has been no Library in the Institution, and the Board set aside \$200 for the purchase of one. This had been neglected too long, for in this age of cheap books no family should be without a supply of good reading matter for the children. The boys are delighted with the books, and they aid the House-Fathers in entertaining the children during the long winter evenings. The same amount of money could not have been more wisely expended. The books not only delight and interest the boys, but give them new subjects for conversation and reflection when they are at their work. The boys seem to appreciate the efforts of the Board to interest them and to improve their condition, and are much better contented than formerly, and hence there are a less number of escapes.

The main object of the Board is to make life in the Institution correspond, as far as possible, to the home-life of a well-regulated family. The greatest improvement in the conduct of the boys is found in the families where the House-Fathers are diligent in providing amusements and games, and make it a *business* to interest the boys.

EMPLOYMENTS OF THE BOYS.

The principal industry is putting cane seats in chairs. During the year 120,000 seats were made. This is good employment to learn the boys habits of industry, but the knowledge thus acquired is of very little use to the boy when he leaves the Institution. More than three-fourths of the boys come from the large cities and towns, and these boys should be taught some trade that will help them to get employment when they leave the Institution. Many of the boys

work in the garden and on the farm, but a boy whose friends live in the city or town will not take to farming when he is released. This is a question which has given the Board much trouble to solve, but we feel that the Institution is not doing the work it was intended to do unless the boys are taught some useful trade. We hope during the coming year to start some additional industries, and not rely entirely upon the caning department and farm for employment.

THE FARM.

The State farm contains 225 acres; but so much of this is occupied by the buildings and play-ground, and is waste land along the creek, that there remains only about 135 acres of tillable land. For several years, 160 acres of land adjoining has been rented and farmed, but the Board has determined in the future not to continue the lease of this land. If the 135 acres are cultivated as they should be, it will give employment to as many boys as will be likely to follow farming when they leave the Institution. With so many boys at our disposal, not a weed should be allowed to grow on the place.

THE DAIRY.

The Board has made a special effort during the year to increase the number of cows and the quantity of milk. For children pure sweet milk is the best and cheapest nourishment. The cows on the farm are of an inferior breed, and there is still room for improvement in this department.

COST PER INMATE.

As required by the 20th section of the act creating the house, we estimate the cost of keeping each inmate for the coming year at one hundred dollars.

FINANCES.

The Board take great pleasure in reporting that, for the second time in the history of the Institution, there is an unexpended balance of the appropriation, amounting to \$10,500, which was not drawn from the treasury. The Legislature appropriated \$53,000, and only \$42,500 has been expended.

The following is a summary of the receipts and expenditures, full details being given in the accompanying statements.

Receipts.

Amount from State Treasury	\$42,500 00
Amount of earnings, chair shop	4,878 90
Sale of hides, tallow, etc.	370 81
Total	<u>\$47,749 71</u>

Disbursements.

Expenditures for maintenance, support, etc., as per detailed statement herewith	\$42,500 00
Earnings of chair shop paid into State Treasury . . .	4,878 90
Amount from sale of hides, tallow, etc., paid into State Treasury	370 81
Total	<u>\$47,749 71</u>

It will thus be seen, from the above, that the whole cost of the Institution for the past year was	\$42,500 00
Deduct from this the earnings of the boys, and the amount realized from the sale of hides, tallow, etc., as above . . .	\$5,249 71
And amount paid for buildings and improvements	4,874 74
	<u>10,124 45</u>

And we have \$32,375 55
 As the net cost of the Institution for the year.

There was paid into the State Treasury, by the counties, for the support of boys sent at the expense of the counties, the sum of \$20,989.47.

In order to determine the amount for which the Institution is a charge upon the State Treasury, we make the following statement:

Total amount expended	\$42,500 00
Received from earnings of boys and sales of hides, etc., and paid into the State Treasury	\$5,249 71
Paid into the State Treasury by counties	\$20,989 47
	<u>\$26,238 18</u>

Leaving only \$16,261 82
 As the amount paid by the State.

Notwithstanding the fact that there was also \$10,000 of the appropriation for the year ending October 31, 1878, saved by the Board, the Legislature seemed unwilling to trust the Board and cut down the appropriation to \$40,000. The increased price of flour, provisions and groceries of all kinds, and, indeed, all other articles that are required, may cramp the Board for means before the year closes.

The Superintendent is furnished, at the commencement of each month, with an estimated amount of money necessary for the purchases of the month, and at the close of the month the Board examines and approves the bills for all purchases. This rule was adopted some eighteen months since, and the Board, finds that it works very satisfactorily. The Board is responsible for the proper expenditure of the funds, and hence the Superintendent is not authorized to make purchases, except for supplies, without the authority of the Board.

In conclusion, we have only to say, that in the future we will continue to do all in our power to make the Institution a blessing to the boys and the people of the State.

SUPERINTENDENT'S REPORT.

To the Board of Commissioners

of the Indiana House of Refuge:

GENTLEMEN: I herewith submit to you my fourth annual report of the condition and workings of the House of Refuge for the year ending October 31, 1879.

It gives me pleasure to report the Institution in sound financial condition, with ample funds for properly carrying on the work in all its departments.

The premises are in good repair, and the grounds are improved and beautiful, so that no expensive changes will be required on them for some time to come.

SCHOOLS.

I have endeavored to keep the schools fully up to their former excellent standard. There are now eight grades, in charge of thorough and competent teachers, and I am pleased to state that, with very few exceptions, the boys are making commendable progress in their studies.

The time was when many of our educators regarded the mere cultivation of the intellect as the best means of diminishing crime, but from past experience this theory is being reconsidered. It might have been concluded without any very great experience that the imparting of knowledge and the improving of the intellect would simply enable the possessor to use more effectually these instruments to carry out his designs for good or evil.

Thorough study of the various branches of learning taught in our schools will never fully reform a boy, nor make a corrupt heart

sound. There never was a greater absurdity than such a supposition.

But it has been affirmed that education places resources within reach to occupy the time and the mind, which would otherwise, through idleness, be passed in mischief. It is late in the day to imagine that all reading matter is calculated to do good; that the time passed in the perusal of licentious and corrupting literature is less likely to make boys vile than idleness itself.

From an examination of prison statistics, it becomes evident that while the mass of criminals are from the ignorant and unenlightened classes, the *great* criminals, those most adept in evil, and whose crimes are such as to almost undermine the foundations of society itself, have had the benefit of what is termed an education.

Therefore, we must fall back on the wise admonition, "Train up a child in the way he should go, and when he is old he will not depart from it." There must be a moral education, and as there can be no pure morality that is not based upon religion, this should form a part of all the education and training of the inmates of reformatories. No thorough reformation on the part of our boys can be expected unless they are brought under the proper religious influences; therefore all the employes should be persons of pronounced religious convictions.

Our commodious chapel has been made still more comfortable by being seated with nice pews. The Sabbath-school exercises have been very interesting and instructive, and a healthy moral and religious growth become more and more evident. It pleases me to again present my acknowledgments to the Rev. J. B. Abbett for his earnest efforts for the salvation of the boys during the past year. There is no question as to the good accomplished by the moral and religious instruction here imparted.

HEALTH.

As a whole the general health of the boys has been good, the only severe sickness being several cases of typhoid fever. There have been three deaths since my last report, viz: Charles Emerson, who died on the seventeenth day of December, 1878, of consumption; James Paris, who was accidentally drowned last May while fishing, and Julius Robertson, who died on the seventh day of October, after a lingering illness. Our physicians, J. T. Strong and

J. E. Welliver, deserve great credit for their earnest and successful efforts in behalf of those who were sick with the typhoid fever.

THE FARM.

The State farm contains two hundred and twenty-five acres, well fenced and in good condition. I would, however, suggest that the upland be thoroughly under-drained. We have also rented and farmed one hundred and sixty acres of land belonging to J. S. Moore, with good results. The lease of said land expires on the first of March next, and as it has not been renewed, the Institution will be limited to its own land next season.

We are well supplied with agricultural implements and all appurtenances belonging to a well regulated farm. I herewith submit a schedule of the acreage of crops:

Wheat	50 acres.
Corn	75 acres.
Oats	30 acres.
Potatoes	30 acres.
Beans	12 acres.
Onions...	4 acres.
Turnips	4 acres.
Meadow	35 acres.
Gardening purposes.	20 acres.
<hr/>	
Total.	260 acres.

The crops for the season are good, and we are well supplied with provender for winter use. The work on the farm and in the garden has been performed almost entirely by the inmates. We have been endeavoring to improve the stock of cattle and horses, and have made good progress. We are now supplied with good horses, a thorough-bred bull, and short-horn cows. I append a schedule of stock, implements, etc.:

Work horses.	10
Buggy horses	3
Milch cows	30

Yearlings	5
Heifers	1
Calves	16
Oxen	2
Beeves	6
Bull	1
Hogs (stock)	118
Hogs (fat)	17
Sows (brood)	15
Wagons	7

The above stock of implements are in good repair, many of them being nearly new.

CONCLUSION.

In conclusion, gentlemen, allow me to tender my heartfelt thanks for your confidence and support in all our official relations.

Feeling that I have put forth my best efforts in the management of all the affairs of the Institution, as well as for the welfare of the boys under my charge, and hoping that God may bless the school and continue to prosper it in the noble work for which it was established,

I remain, your obedient servant,

JAMES O'BRIEN,

Superintendent.

REPORT OF CHAIR SHOP.

To the Superintendent :

I present the following as the report of the Chair Shop for the year ending October 31, 1879 :

We have been abundantly supplied with frames, and have had an average working force of one hundred and eighty boys per day, who have caned during the twelve months past over one hundred and twenty thousand frames.

Our work has given satisfaction, and, I think, has been done better and more cheerfully than at any previous time.

As the habit of industry is most essential in the education of these boys, and as no reformation would be thorough with it omitted, I am confident that this branch of it has been successfully accomplished.

Our largest month's work during the year amounted to nineteen thousand frames caned

The job boys' shop, where all "trusties" work for a per cent. after their other duties are performed, has been, and is, a success, each boy earning from five to ten cents per week, which is placed to his credit.

The year's success has been in a great measure due to your method of appealing directly to the boys in all matters pertaining to their interest and to their fields of labor, and each family record, and the cheerfulness manifested in each department, is testimony sufficient to prove that a better spirit has been inaugurated and a feeling of self-reliance shown that no other method could have accomplished.

E. H. SHUMWAY,

Overseer Chair Department.

BOYS' LETTERS.

EDINBURG, INDIANA, July 6, 1879.

Bro. O'Brien :

DEAR SIR:—As it is nearly time for my ticket to expire, I will write for another. I am now learning the carpenter's trade; have been working at it since school closed; I am to work at it three years for my board and clothes. We had a splendid time here the Fourth of July; I know the boys had a nice time, for I have never known it to miss yet; I thought of them many times that day, and would like to have been with them. I will come out and see the boys some time this fall. Please give my best respects to all the officers and boys.

I remain, as ever, your pupil,

A. J. K.

PARKERSBURG, W. VA., May 5, 1879.

Bro. O'Brien :

DEAR FRIEND:—Being at leisure, I will improve the time by writing you a few lines to inform you of my health. I have not heard anything from the school for so long, thought I would write for information. I suppose the boys had, as usual, a nice time during the holidays. Bro. O'Brien, please give me my discharge papers, and oblige me very much. Tell the boys in chapel you had a letter from me, and that I am doing well among strangers. I intend coming to Indianapolis in July or August next, and will visit you.

Very truly, yours,

C. M. G.

WEST LEROY, MICHIGAN, August 24, 1879.

Bro. O'Brien :

DEAR SIR:—In reply to your last, I would say that I have been too busy to write before. This is a very busy time with farmers, and when I get through with my day's work, I am too tired to write. I think of going to the Valparaiso Normal School this winter, if you are willing for me to come back to the State. I will try to come and see you this fall. If you knew how much good a long letter from you would do me, I believe you would write one. Hoping to hear from you soon,

I remain, as ever, your boy,

S. K.

ROBINSON, ILLINOIS, July 12, 1879.

Bro. O'Brien :

DEAR SIR:—I have been thinking of writing to you for some time. I have been very sick, so that I could not write at the time my ticket-of-leave expired. Work is scarce, and money still scarcer. I would like to see all the folks at the school. I have a good place to work next fall and winter, with George Ross & Co., butchers, in Danville, Ill. Please send me another ticket. Thanking you for past favors,

I remain, as ever, your boy,

J. A. E.

OFFICE SUPERINTENDENT PUBLIC SCHOOLS,
VINCENNES, IND., November 12, 1878.

Mr. O'Brien, *Superintendent Reform School* :

It gives me real pleasure to inform you that Roland Massey is a *model* boy since his return to his home. He goes to school every day, and his teacher says he is a "real good boy." He is, in my opinion, not the kind of a boy to remain longer at a reform school, and I hope he will be allowed to stay here where he is doing so well.

Very respectfully,

T. J. CHARLTON,
Superintendent Public Schools.

BELLE UNION, INDIANA, June 13, 1879.

Mr. O'Brien :

DEAR SIR:—I thought I would let you hear from your boy, D. W. He is well, and says he is well satisfied, and likes to stay here. Dan. is a very good boy. I thought awhile I would have to bring him back; but now I like him very well. He is learning how to do his work fast, and tries to please me. Yours,

J. B.

SORGHSTOWN, KENTUCKY, May 23, 1879.

Mr. O'Brien :

DEAR SIR:—I arrived home all right, and mother was so glad to see me. I left my ticket in Indiana. Will you please send me another. I feel so lonesome. Is G. W. out yet? We got on board of the Bowling Green, and got here at about ten o'clock. This is all for the present, so good-bye.

From one of your boys,

P. B.

SOUTH BEND, INDIANA, August 18, 1879.

Mr. O'Brien :

DEAR SIR:—The time has gone by again, and I thought I would ask you for a new ticket, and whether I had to write any more. I am still working at the same place. I send my best respects to all the boys, and hope they are well. Please let me know how A. G. is getting along. Please address box 547. Yours truly,

C. M.

GREENSBURG, INDIANA, September 3, 1879.

Bro. O'Brien :

SIR:—I am well, and doing well. My ticket-of-leave expired last Sunday, so I thought I would write for another one. I intended to come to see you before long, but father wants me to start to school, so I can not come. I would like to see the boys and officers. Please write me all the news, and send me a ticket.

Yours truly,

E. E. C.

CHICAGO, ILLINOIS, June 1, 1879.

Bro. O'Brien :

DEAR SIR:—I am working with Mr. Sanders, learning the plasterer's trade. I go to Sunday-school, and am trying to be a good boy. I thank you for what you have done for me. I would like for you to send me another ticket. I am living at No. — Michigan avenue. This is all for this time.

C. C.

FRANCISVILLE, INDIANA, August 29, 1879.

Bro. O'Brien :

DEAR FRIEND:—I write you a few lines to let you know that I am well at present, and I hope to hear the same from you. I thought I would write for another ticket-of-leave. Please send me one. I have earned five dollars since I came home, and am trying to behave myself.

Yours truly,

O. H.

LOUISVILLE, KENTUCKY, May 25, 1879.

Mr. O'Brien :

I thought I would write you a few lines. I am getting along finely. I am working with my stepfather, and doing well. I am much obliged for the ticket-of-leave. Your boy,

L. G.

ANNUAL REPORT

GOVERNOR'S OFFICE.

Received February 19, 1880, and referred to the Auditor of State for a verification of the financial statements. Returned with his certificate (q. v.) appended.

Examined by the Governor, and transmitted to the Secretary of State, to be filed and preserved in his office and published as may be ordered by the Commissioners of the Public Printing.

SAMUEL R. DOWNEY, *Secretary.*

Filed in my office February 20, 1880.

J. G. SAANKLIN,
Secretary of State.

DIRECTORS' REPORT.

DIRECTORS' OFFICE, INDIANA STATE PRISON SOUTH,
JEFFERSONVILLE, INDIANA, December 3, 1879.

To His Excellency, JAMES D. WILLIAMS,
Governor of Indiana:

The undersigned, Directors of the Indiana State Prison South, herewith respectfully submit the reports of the Warden and other officers, showing the details of the operations of the prison for the fiscal year ending October 31, 1879.

By reference to the Warden's report you will ascertain the amount of convict labor under lease, at what price per day, and when the contracts severally expire. It will also be seen that there is a small decrease in the number of convicts as compared with the preceding year. During the preceding five years the number increased sixty-five per cent.

With the general revival of business throughout the country, affording employment for all who desire to earn an honest living, it would seem that there is a reduction in the number of criminal offenders, and that the convict population will for a time decrease rather than increase.

It is estimated that of the whole number of convicts in a State prison, eighty per cent. are available for contract labor. The remaining twenty per cent. includes the insane, the sick, the crippled, and the laborers employed in policing the cell houses, shops and prison grounds, and at work in the prison, garden, kitchen, dining room, tailor shop and laundry, and in attending the sick in hospital; the probability being that the average number of convicts will be below six hundred, and having four hundred and ninety-five (495) under lease, we conclude that employment is provided for all the available labor.

The last General Assembly made a specific appropriation of \$12,000 for the construction of a building to contain hospital, chapel, tailor shop, laundry, boiler and engine room, and to furnish machinery for the same. The building and machinery had been contracted for, and was in process of construction at the close of the year. The old chapel and hospital building is being torn down and removed, as contemplated in making the appropriation, to make room for a new cell house.

On the night of April 1st the old shed building occupied as a cooper shop was consumed by fire. There being no other building in which to employ the labor, you set apart out of the general contingent fund four thousand dollars to be used in the construction of a suitable brick building. Such building was constructed with a specific view to protection from fire. It is substantial in its character, and in its appointments better adapted to general prison shop purposes than any other within the inclosure. For details of expenditure see Clerk's table.

With six hundred convicts and only three hundred cells it has been necessary to crowd the halls of the cell houses with cots and to occupy the second story of the dining-room building for a dormitory. On account of the overcrowded condition of these sleeping apartments it was impossible to preserve that uniform good health attainable under more favorable conditions, and yet there was no unusual amount of malignant sickness. The death rate was very small, being a fraction less than one per cent. When the additional cell house provided for shall have been constructed, and every prisoner given a cell, the rate of sickness will be largely decreased. For further particulars see Physician's report.

For want of a chapel, religious meetings for the convicts have not been held, nor have we had any available room for Sabbath or other school purposes; yet the Moral Instructor and missionary workers have succeeded in exercising a considerable influence with many of the inmates. For more particular statement you are respectfully referred to the excellent report of our very worthy Moral Instructor, who has been faithful, zealous and untiring in his efforts to build up and maintain moral sentiment among the convicts. In the near future the new chapel will be ready for occupancy, when the usual religious exercises and night schools will be resumed.

With our brief experience it strikes us that the laws for the government of our prisons and relating to matters connected therewith

are very incomplete, and in some particulars wholly wanting ; but as we shall report for the year 1880 prior to the meeting of the General Assembly, we think it advisable to reserve those matters for next report, when we shall have had one year's more experience and better matured suggestions to make.

The sanitary condition of the prison has been good ; all the buildings, grounds and roadways having been kept in good order and as cleanly as possible. The prisoners have been well clad and made as comfortable as practicable in the overcrowded sleeping apartments. They have been well and abundantly fed upon good wholesome food, and well cared for when sick, and have only been required to do such amount of labor as they were severally well able to do, not exceeding the amount performed by labor similarly occupied in shops outside.

The discipline of the prison has been very good.

The Warden and his assistants have faithfully and zealously discharged their duties under the laws, rules and regulations of the prison, and the advice and orders of the Directors.

Director John W. Linck's absence in Europe prevents him from joining in this report.

We are, sir, very respectfully,

Your obedient servants,

THOMAS SHEA,

P. L. D. MITCHELL,

Directors.

WARDEN'S REPORT,

INDIANA STATE PRISON SOUTH,
WARDEN'S OFFICE, December 1, 1879.

To the Honorable Board of Directors :

For the fiscal year ending October 31, 1879, I would report :

Convicts in prison October 31, 1878	626	
Received from courts	261	
	—	887
Discharged by expiration of sentence	265	
Pardoned by the Governor	17

The contracts for hire of labor, now in force, are as follows :

- With Oliver Perin, manufacturer of shelf hardware, to expire September 19, 1881, at 45 cents per day . . . 100 men.
- With James W. Gaff, manufacturer of shelf hardware, to expire September 19, 1881, at 45 cents per day . . 100 men.
- With Perin & Gaff Manufacturing Company, manufacturers of shelf hardware, to expire September 19, 1881, at 45 cents per day 100 men.
- With J. R. Gathright, manufacturer of saddle-trees, to expire February 22, 1881, at 45 cents per day . . . 20 men.
- With Rider & Hyatt, manufacturers of cooperage, for one year, from February 1, 1879, with the privilege to extend the time to five years, at 45 cents per day . . 50 men.

With Theodore Goldman, manufacturer of boots and shoes, to expire July 1, 1884, at 45 cents per day	40 men.
With Theodore Goldman, manufacturer of boots and shoes, to expire July 1, 1884, at 30 cents per day . .	25 men.
With Joseph Isaacs, manufacturer of boots and shoes, to expire July 1, 1884, at 45 cents per day	35 men.
With Joseph Isaacs, manufacturer of boots and shoes, to expire July 1, 1884, at 30 cents per day	25 men.

In February, 1876, all the labor became idle here by means of the bankruptcy of the contractors. At that time, and for several years previous, the labor of both prisons was leased at sixty cents per day, which was sufficient under economical management, with all the labor employed, to support the institutions and pay a balance into the State Treasury. But in the financial stress of the business of the country it was very difficult to lease the labor at any price. Contracts were subsequently made here at forty-five cents per day, and at the Northern Prison the labor under the existing contracts was reduced to that price as a relief to the lessees. Subsequent contracts have been made at the same figure for able bodied men.

The general revival of business a few months ago, giving employment to all the free labor of the country, with an upward tendency in wages, together with the numerous threatened strikes, has created an unprecedented demand for convict labor. It can not be doubted that as the present contracts expire you will find it practicable to let the labor at sixty or more cents per day, or thirty-three and one-third per cent. more than under the present contracts. When this shall be accomplished the prisons will be a source of considerable income to the State.

For financial and statistical details you are referred to the accompanying Clerk's statements and tables.

Very respectfully submitted,

ANDREW J. HOWARD,

Warden.

PHYSICIAN'S REPORT.

INDIANA PENITENTIARY SOUTH,
JEFFERSONVILLE, October 31, 1879.

To the Honorable Board of Directors:

GENTLEMEN—At the close of another year it becomes my duty to present you a report of the health and mortality of this institution.

There have been six deaths during the year, all of which except two were men with broken-down constitutions before coming into the prison, and died with the following diseases, to wit:

John Shewman died December 28, 1878, of phthisis pulmonalis. Orlando Hatfield died March 2, 1879, of phthisis pulmonalis. Charles Meginin died June 27, 1879, of congestion of the brain. Alfred Applegate died July 22, 1879, of phthisis pulmonalis. William Gant died September 24, 1879, of congestion of the lungs. Palmer Hudson died October 24, 1879, of phthisis pulmonalis.

You will observe from the list of deaths that four out of six fatal cases were from lung disease, or, in other words, consumption.

At this time there is but little sickness in the prison, outside of consumption cases. The health of the prison has never been better than during the past year. There has been a less number of deaths and less time lost by sickness, in proportion to the number of convicts, than during any previous year. I will not say that this is altogether the result of medical treatment, or to any *one* thing.

No doubt much sickness has been prevented by the regulations here enforced. The cleanliness of person, the regular hours allotted to work, the substantial nature of the diet, and the ample time devoted to rest, all have a tendency to improve the constitutions of those who have previously led dissipated lives, *provided no organic trouble becomes developed before their admission.*

There are several notable examples at present in the prison where this favorable improvement has occurred, particularly among those prisoners who are more comfortably quartered, and it would be manifest in others if proper hygienic regulations could be carried out.

In regard to the diseases met with and treated during the past year, I would respectfully refer you to the tabulated statement appended.

Respectfully submitted,

W. F. SHERROD,
Physician.

MORAL INSTRUCTOR'S REPORT.

STATE PRISON SOUTH,
CHAPLAIN'S OFFICE, November 30, 1879.

To the Honorable Board of Directors :

In presenting this, my fourth annual report of the work of this Institution coming under my immediate jurisdiction, I must say that we have labored under some embarrassment the entire year for want of a suitable place to assemble for Sabbath-school and preaching, it being necessary to occupy the chapel as a sleeping apartment, owing to the crowded condition of the cell-house. But we are pleased to say this difficulty will soon be obviated by the opening of the new chapel soon, which will be very commodious and creditable to this Institution and the State. My time has been occupied by visiting the prisoners at their cells and other sleeping apartments, distributing papers and holding religious conversations with them. The library is doing good work in the prison. The books are kept neatly covered and distributed by trusty men appointed by the Warden, and under my supervision they patiently and impartially change the books once in every two weeks. We have fifteen hundred volumes in library, consisting of religious works, histories and fiction, all of which are much sought after and read by the convicts. The cause of crime, aside from human depravity, lie so hidden in the domestic circle and early associations of most of our convicts, and their own statements are often so contradictory, while they represent all classes of society and all the ordinary methods of moral training known in the country, it becomes more than difficult to present any reliable statement from which just conclusions may be drawn.

One result of my observation and experience on this subject, however, is a deep conviction of the utmost importance of a more

thorough religious education in childhood. The fact is apparent in all the cases under my notice that where there were any religious influences surrounding the prisoner in early life they were extremely irregular, and no settled principles were fixed in his mind. Attendance at church with any degree of regularity was rare, while a general neglect of parental authority is admitted. The following statement has been compiled from frequent conversations with prisoners in my rounds of visitations, and I think gives as satisfactory an idea of the cause of crime in individual cases as is possible to reach, judging from the prisoner's account of himself prior to his arrest and conviction :

Bad company, frequenting bar-rooms, houses of ill fame and low places of amusement	190
Intemperance	175
Gambling	142
Covetousness	40
Domestic difficulties	25
Poverty	21
	<hr/>
	593

To change and bring about a reformation there must be a change in the family government and training of children. Let the government be mild and yet firm. Let the Bible and its influences be felt and the institutions of the church and Sabbath school be constantly attended, and this will give the youthful mind employment without the attendance of the above-named places of vice and temptation. The same may be said of our convict class, for they are yet human, and not beyond the point of reformation. Let them have the opportunity of attending church and Sabbath school ; let the truths of the Bible be impressed upon their minds, and let them feel that the prison is not only a place of punishment but of reformation, and that there are those that care for their spiritual as well as their temporal welfare, and many will change their course of life and return to liberty to live an honorable and useful life. Also believing that education is a vital force in reformation, I have made the utmost effort within my power, with the facilities at my command, to place in their hands such school-books and to give instruction, as far as possible, to all that the Warden saw proper to

admit to the school, and we are pleased to say that all has not been in vain. Of the eighty in attendance and in the possession of books, forty-eight learned to read, thirty-five learned to write, twenty-five have acquired a knowledge of arithmetic, who had not studied in school, and many more have improved their studies in this branch of education. In addition to the elementary book furnished by the State, many have with their own funds purchased copy books, slates, pens and pencils, ink and cap paper. All who tried made astonishing improvement, especially in reading and writing.

In my work I have been treated with kindness and courtesy by all the officers, and rendered all the assistance possible consistent with good government by the Warden and his deputy. And now, in conclusion, allow me to return to you my sincere thanks for the kindness shown me, and may the blessings of an All-wise Providence be with you through life.

Respectfully,

N. E. BORING,

Chaplain.

WARDEN'S REPORT,

NORTHERN INDIANA STATE PRISON,
MICHIGAN CITY, October 1, 1879.

Governor James D. Williams, Indianapolis, Ind.:

DEAR SIR—I have the honor to herewith submit for your consideration my report of the financial operations of the Northern Indiana Prison from October, 1878, to August 31, 1879.

The circumstances that arose in regard to the question of who were the legal Directors of this prison, was finally decided by the Supreme Court in favor of the newly-elected board, although two of the old and one of the new board were holding the offices of Directors, transacting all the business appertaining to the duties of Directors, until the 16th of September, 1879. After the decision of the Supreme Court, made about the 17th of September, 1879, the new board came into the possession of the offices of Directors, and I, as the Warden of the prison, made with them a written agreement that I should turn over, on the 1st day of October, to them and my successor in office, James Murdock, the possession of the prison, with all the property, etc., belonging to said institution, and that I should also make all disbursements and receive all moneys due the prison for the month of September, 1879, and turn over to James Murdock, Warden, the balance, if any, on the monthly settlement, which I have done, and have his receipt for the sum, amounting to \$1,459.78. The accounts, with vouchers and receipts, were approved by the new board, and audited by James Murdock, Warden. I also have his receipts for all property belonging to the prison.

Under the above existing state of affairs, the old board retired from office before the end of the fiscal year, which left me the only alternative to report directly to your Excellency, during the above stated time, the financial operations of the prison, the incoming

board not having transacted any of the business appertaining to these accounts. The following is a statement showing disbursements and receipts of the prison :

Total amount of disbursements for prison from October 1, 1878, to August 31, 1879.....	\$65,579 06
Amount of receipts and earnings of prison for same time.....	63,837 65
Showing balance of disbursements over receipts to Aug. 31, 1879.	\$1,741 41
Less amount of receipts over disbursements for September, 1879.	1,459 78
Balance.....	\$281 63

The above balance was turned over to James Murdock, Warden, with vouchers, etc., of September accounts. This shows that the prison has, within the amount of \$281.63, been self-sustaining. The United States is owing, on account of the failure of Congress to make the necessary appropriations to pay, for the keeping of the United States prisoners confined in the prison, being the sum of \$1,764.50. Had this amount been paid, the prison would have not only been self-sustaining but have showed a surplus of nearly \$1,500, which, I think, to be a very satisfactory showing of the financial operations of the prison, taking into consideration the low price of convict labor under the existing contracts.

I also turned over to James Murdock, Warden, the amount of \$1,378.86, being balance in my hands belonging to prisoners.

I herewith enclose a statement (marked A) showing the receipts and disbursements. Also, statement (marked B) showing the final settlement made as Warden, for all of which disbursements I have vouchers, receipts and quietuses of Auditor of State.

All of which is most respectfully submitted.

I have the honor to remain,

Most respectfully,

Your obedient servant,

CHARLES MAYNE, *Warden.*

DIRECTORS' REPORT.

DIRECTORS' OFFICE NORTHERN INDIANA PRISON,
MICHIGAN CITY, INDIANA, October 1, 1879.

To His Excellency, JAMES D. WILLIAMS,
Governor of the State of Indiana :

SIR—We have the honor to present to your Excellency our first partial report of the condition and management of the Penitentiary North, for that part of the fiscal year extending from the 1st day of October, 1878, to the 1st day of October, 1879, accompanied by reports of James Murdock, Warden, Dr. J. S. McNutt, Physician, Rev. H. B. Miller, Moral Instructor, and H. E. Sidener, Clerk, to all of which we refer your Excellency for specific information.

We desire to state, by way of explanation, that the present Board of Directors were elected by the Legislature of the State, according to the laws and customs practiced by that body for twenty years, and commissioned by your Excellency on the 18th day of February, and according to our election and commission we entered on the discharge of our official duties on the 11th day of March, 1879; but on the following day, while absent from the prison, it was forcibly taken possession of by two of the former Directors, Robert Dyke and John W. Baker, and the ex-Warden, who, by their illegal and revolutionary course, prevented this Board from discharging their official duties, as they had the lawful right to do. Therefore this Board can not be held accountable for the management or accuracy of the accounts during that portion of their term of office, from the 11th day of March until the 1st day of October, 1879; but we would say that we examined the accounts of the earnings and expenditures of the prison, as presented by the ex-Warden, covering the period named, and recommended the allowance and payment of such accounts as we thought to be just and right. We trust that in the future no such unfortunate disagree-

ment and conflict of authority will occur. We had hoped to be able, on our induction into office, to inaugurate some reforms and hire the prison labor at such remunerative prices as to insure the future prosperity of the Prison North. In this we have been much disappointed on account of unwarranted interference with our authority and the action of our predecessors in a seeming desire to usurp the functions of our office in the hiring of convicts on the eve of their retirement at very low wages, for a long period of time. We still hope, however, to be able to make the prison self-sustaining during our term of office, notwithstanding the advanced price in food and clothing, and our inability, on account of former contracts, to receive the full value of prison labor.

The earnings of the prison have been \$69,259.49; the expenditures have been \$68,779.57, showing earnings and receipts of \$479.92 over expenditures. The number of prisoners has been steadily decreasing since the last annual report. At that time there were 605; at present there are 542. This should be gratifying to the people of the State, as it clearly demonstrates the fact that crime is not so great as it was during the period of hard times. In relation to the internal management of the prison we desire to say, in justice to our predecessors, that the purchase of provisions, clothing, groceries, etc., seems to have been carefully and well made, and at lower rates than like articles can be purchased at the present time, but some of the buildings and the property generally belonging to the State have not been kept up to the full standard of care and preservation, and in order to put it in good condition we will necessarily have to expend a considerable sum of money, and as the Legislature made no appropriations for that purpose we will endeavor to save the necessary amount from the earnings of the prison.

On the first day of October, when we came into peaceable possession of the prison, we found that all the convicts were engaged on contracts previously made, ranging from two to five years. One of the old contracts that had been running for nearly five years, for eighty men, expires on the first day of January, 1880, and one for fifty men expires on the fifteenth day of March. These men we hope to be able to relet at advanced prices. There is another contract for one hundred men, entered into by our predecessors just before their official term of office would expire, for five years, in which it is stipulated that the State shall furnish fifty of the men sought to be contracted, twenty-five in May and twenty-five in

August, long after their official term of office would expire by limitation.

We think that the interest of the State would be promoted by enlarging the district of the Northern Indiana Prison. It has a capacity sufficient to accommodate and work eight hundred convicts, and on account of its favorable and healthful location, as well as the great commercial advantages now and hereafter to be secured at this point, that number of convicts could be better and more profitably employed here than elsewhere. There is one class of prisoners, however, to whom we desire to call your Excellency's special attention—that is, the insane. Their condition calls loudly for more adequate and effective means to be adopted by the State for their comfort and welfare. Justice and humanity alike would seem to dictate that some provision should be made to remove them to the asylum built by the State for the reception of such persons; or if such a course can not be adopted, then in that case a suitable building should be constructed within the prison, with a sufficient number of solitary cells and other conveniences that are needed to enable the prison physician to more effectually treat them with such medical aid and assistance as their unfortunate condition would seem to require.

The health of the convicts during the last year and at the present time is especially good. During the last year only nine deaths have occurred, and at the present time there are fewer persons in the hospital and a less number are excused on account of inability to work than perhaps at any former period. This is doubtless largely due to the care and watchfulness of the physician, Dr. J. S. McNutt, and his able assistant, Dr. A. J. Mullen, as well as the liberal and healthful supply of food furnished by the Warden.

There is a lack of proper accommodations and facilities for bathing. This should be remedied at the earliest possible moment, which can only be done by the construction of a building suited to the purpose. The betterment of the prison would also demand the erection of a building suitable for laundry and drying purposes.

The building occupied by the Warden is old and inadequate for the accommodation of his own family, let alone the visitors and others who expect the hospitalities of his house. We would recommend a new and commodious building to be erected, with sufficient room and conveniences, such as would reasonably be required for his dwelling.

The discipline of the prison is good, and with the co-operation of the Warden and his efficient deputy, Mr. Eli P. Baker, we hope to be able to maintain and advance it to the highest attainable standard.

It affords us pleasure to be able to state to your Excellency that the present contractors are meeting their labor bills promptly, and we have every reason to believe they will continue to do so, and that we shall be able to make the Northern Indiana Prison thoroughly self-sustaining during the coming year.

Respectfully submitted,

JOHN LEE.

FREDERICK HOOVER.

SIMON WILE.

WARDEN'S REPORT

OFFICE OF THE WARDEN,
NORTHERN INDIANA STATE PRISON,
MICHIGAN CITY, IND., October 31, 1879.

*Messrs. J. Lee, F. Hoover and Simon Wile,
Board of Directors of the Northern Indiana Prison:*

GENTLEMEN—I have the honor to herewith submit for your consideration that portion of the annual reports of the Northern Indiana Prison that came within my duty as Warden. On the 1st day of October, 1879, the possession of said prison was surrendered to me by Charles Mayne, the former Warden. On that date, and all the unsettled accounts for the month of September, 1879, including all receipts, etc., for that month, was finally passed over to me, and audited by your honorable board, with all the State Prison property.

This report is made from the 1st day of September, 1879, to October 31, 1879, with this exception, that the financial portion shows only the month ending September 30, 1879. The disbursements for current expenses for October, 1879, could not be reported, for the reason that they could not be examined and approved until the meeting of the board on the 15th of November, 1879. Then they could not be audited in the fiscal year, but will be reported in my annual report for 1880.

I have also received from Charles Mayne, former Warden, two notes of \$1,000 each, both dated April 19, 1879—one for 6 months and one for 1 year, bearing interest at six per cent., signed by H. H. Walker and D. E. Case.

For further information of the financial and statistical condition of the prison I would respectfully refer you to the report of the clerk, H. E. Sidener.

As I only took possession of the prison on the 1st of October, 1879 (settling by agreement all the accounts and receipts of the prison from the 1st of September, 1879), I, of course, have had but a limited knowledge of the institution, but have seen the necessity of some improvements that would be of great value to the interests of the prison.

First, I would call your attention to the importance and necessity of having a solitary prison for the insane and incurable, also for refractory prisoners, which is almost indispensable for good and humane treatment of the insane. A bath, wash and dry house, and also a warden's residence, which is much needed, the present one being insufficient for a small family, let alone to furnish accommodations for guests.

Also, that I find the heating and cooking facilities at present are insufficient. There are now two boilers that are used for that purpose, neither one sufficiently large to heat the buildings during the cold weather, and compels us to keep steam in both boilers, at a large expense for fuel. In order to economize the expenses thereof I would recommend that a boiler of a larger capacity be purchased that would be sufficient of itself to furnish all the steam necessary for all the uses of the prison for heating and cook-

ing during all seasons of the year, the smaller boiler to be sold and pay in part for the purchase of a new one.

I found that the discipline of the prison was good, and since my administration nothing has occurred to report any unusual violation of the rules. The prisoners generally seem to be in as good a condition in that respect as could be expected.

I also find that the sanitary condition of the prison is good. For further information I would refer you to the report of the Prison Physician, Dr. J. S. McNutt.

For the moral and educational condition of the prisoners, I would respectfully refer you to the report of Rev. H. Miller, Moral Instructor.

Before closing my report I would say, that so far as the former officers of the prison, Mr. Charles Mayne, Warden, John H. Bewes, Clerk, and Amos C. Hall, Deputy Warden, rendered me all the assistance and information in their power to assist myself, Deputy Warden E. P. Baker, and Hugh E. Sidener, Clerk, in the duties of our several offices, for which I feel grateful.

To all the officers of the institution I return my thanks for the very efficient manner in which they have performed the several duties intrusted to them.

And to you, gentlemen of the Board, I return my sincere thanks for all the courtesy extended to me at your hands.

I remain your obedient servant,

JAMES MURDOCK, *Warden.*

PHYSICIAN'S REPORT.

MEDICAL DEPARTMENT, NORTHERN INDIANA PRISON,
MICHIGAN CITY, October 31, 1879.

Messrs. John Lee, Frederick Hoover and Simon Wile,
Board of Directors :

GENTLEMEN — In accordance with the rules and regulations of the prison, I have the honor to submit the following as my first annual report for the year ending October 31, 1879 :

As my connection with the prison commenced October 1, 1879, the report for the first eleven months of the year must be based upon the record furnished by my predecessor, Dr. M. G. Sherman.

From November 1, 1878, to October 1, 1879, the records show that fifty-three patients were treated in the hospital. During this period there were nine (9) deaths, viz: Theodore Wellman, age 24 years, died November 11, 1878, of *erysipelas*; Michael Tighe, age 23 years, died December 22, 1878, of *hemorrhage of the bowels* (melœna); Thomas Hartley, age 24 years, died February 15, 1879, of *consumption* (phthisis); William Devault, age 20 years, died February 28, 1879, of *consumption* (phthisis); Peter Brown, age 25 years, died March 2, 1879, of *cirrhosis of liver*; Joseph Revis, age 21 years, died April 12, 1879, of *consumption* (phthisis); Charles Krout, age 24 years, died May 3, 1879, of *consumption* (phthisis); John Williams, age 49 years, died May 7, 1879, of *heart disease*; Edward Higgins, age 21 years, *suicided* by hanging, June 19, 1879; John Vandecarr, age 43 years, died September 13, 1879, of *congestive chill*.

On assuming control of the medical department of the prison, October 1, 1879, an inventory of all drugs, surgical instruments, apparatus, books, cots, bedding, chairs, utensils, fixtures, etc., was carefully made, and the same filed with your honorable body on the occasion of my first monthly report.

From October 1, 1879, to October 31, 1879, inclusive, three patients were under treatment in hospital. The said three patients were found in hospital upon my taking charge of same; two were convalescents and were speedily discharged; the third, Elias Harold, age twenty-eight years, died October 19, 1879, of *gastric scirrhus*. This patient had been in hospital eleven weeks, his disease being in an advanced stage of development when first seen by me.

The new administration has made great improvement in the sanitary condition of the prison. The health of the prisoners will compare favorably with that of the inmates of any like institution in the country.

The fact is so apparent and the want so urgent that it is almost unnecessary to call your attention to the miserable facilities for bathing convicts and to the lack of accommodation for insane prisoners. With better surroundings the four insane subjects could be treated with some hope of relief.

The officers and guards of the prison have done all in their power to assist me in the management of the convicts, for which I herein express my thanks, appreciating the fact that without their co-operation the physician's task would be an arduous one.

Very respectfully yours,

J. S. McNUTT,

Prison Physician.

MORAL INSTRUCTOR'S REPORT.

INDIANA STATE PRISON NORTH,
MICHIGAN CITY, IND., December 13, 1879.

To the Honorable the Board of Directors of the Indiana State Prison North:

GENTLEMEN—In giving myself the pleasure to address, as I now do, this my first report to you, it is not my intention to identify you with any views of my own advocated therein.

SABBATH SERVICES.

The quietness and good order reigning in the chapel during Sabbath service are evidences of a gradual improvement in the demeanor of the prisoners, of an awakening of their better natures, and of a desire for truth, all of which are not merely omens of good, but, in many cases, are indications that God's blessing has already accompanied his truth. My firm conviction is that, while other instrumentalities may be good in their place, the *religious* element must be our *main* dependence for the reformation of the prisoners incarcerated in the Indiana State Prison North. The closer acquaintance I have with human nature the firmer my convictions become that efforts made with the object of reforming the inmates of our penal institutions unaccompanied with the inspiring motives of Christianity must fail of accomplishing any satisfactory or permanent result.

SABBATH SCHOOL.

Mr. H. V. Hitchcock, a gentleman of the highest respectability and standing, has pledged his personal labors to the Sabbath-school in the capacity of superintendent; and superintendent and teachers all feel that the Sabbath-school at the prison is emphatically a place in which to sow good seed for the Master. I regard the Sabbath-

school as a valuable adjunct to our efforts for improving the moral condition of the prisoners.

CONDITION AND NUMBER OF VOLUMES IN THE LIBRARY.

There are now in the Northern State's Prison Library 813 volumes. Many of them have been in the library for a long period, and, in consequence, are much worn, but the majority of the volumes are in good condition. Once each week books, papers, tracts and magazines are distributed to the prisoners. There are a sufficient number of primary school books, but I could use to good advantage Robinson's Progressive Higher Arithmetic and his Universal Algebra. There is a general desire among the prisoners for perusing books calculated by their nature to elevate the mind of the reader, and from which they can attain knowledge that would be beneficial to them after their terms of imprisonment have expired. I am of the opinion that the desire for useful knowledge should be stimulated and encouragement given to those who desire to acquire knowledge, not only as an incentive for others to follow the example set them, for efforts to gain knowledge will call into exercise other powers of the mind and thus change the general tenure of the prisoners' thoughts, which must prove beneficial to the prisoners, to society and to the State.

When I began my duties as Moral Instructor to the prisoners incarcerated in the Northern State's Prison I had no personal experience with men of their class, and my first efforts with them were embodiments of past thoughts, desires and resolves for their moral improvement. Now we start anew with more expansive thoughts, more intense desires, more vigorous resolutions, and with far deeper and more extended plans of action. I shall use every energy of mind and body to prove, as far as I may be enabled, the utmost power of redeeming grace to raise the fallen and to save the lost.

H. B. MILLER,

Moral Instructor Indiana State Prison North.

CLERK'S REPORT.

CLERK'S OFFICE, NORTHERN INDIANA PRISON,
MICHIGAN CITY, October 31, 1879.

*Messrs. John Lee, Fred. Hoover and Simon Wile,
Board of Directors for Northern Indiana Prison:*

GENTLEMEN—I have the honor to submit to you that portion of the financial and statistical operations of the Northern Indiana Prison for the fiscal year ending October 31, 1879, which came under my supervision as Clerk from the 1st day of September, 1879, to October 31, 1879. The financial portion shows for the month of September, 1879, and the statistical portion for September and October, 1879.

I remain your obedient servant,

H. E. SIDENER, *Clerk.*
